

CAUTION

KEEP OUT OF REACH OF CHILDREN

HARMFUL IF SWALLOWED

Avoid breathing of fumes. Avoid contact with skin. Wash thoroughly after handling. Do not contaminate food or feed products.

ENVIRONMENTAL CAUTIONS

This product is toxic to fish. Keep out of lakes, streams, or ponds. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME.

CONTAINER DISPOSAL

DO NOT RE-USE THE CONTAINER. Drain pail completely. Add 1/2 gallon of water, 1/4 cup of detergent, and 1/4 pound of lye. Tighten closure. Rotate pail to wet all surfaces and let stand for at least 15 minutes. Drain completely and rinse several times with water. Tighten closure. Puncture and crush pail to prevent re-use.

DIRECTIONS FOR USE

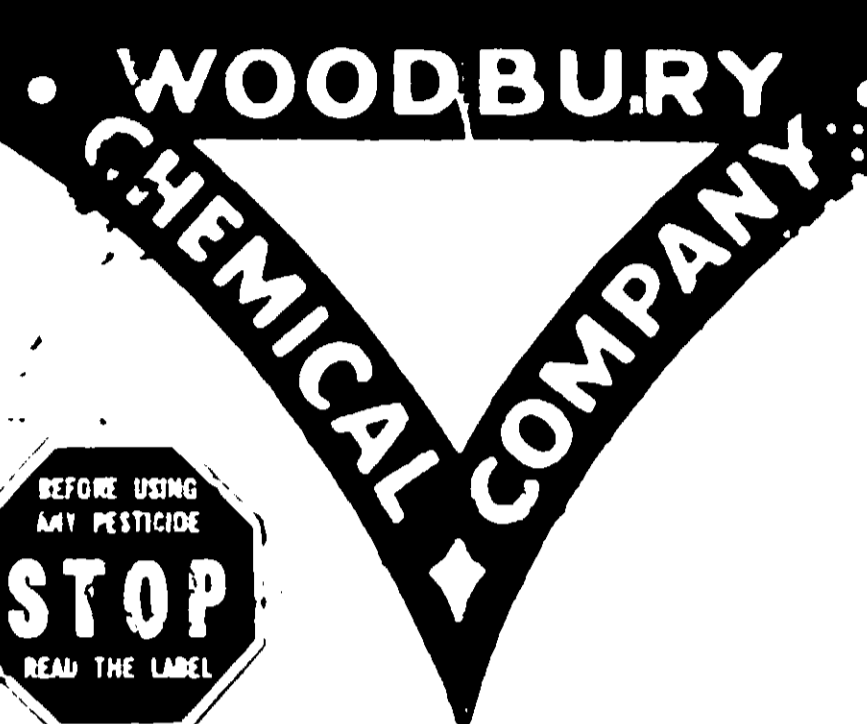

FOR ANTS, BEDBUGS, FLEAS AND BROWN DOG TICKS: Prepare a 3% spray by adding 6 1/2 oz. of WOODBURY CYTHION 5-E Premium Grade, emulsifiable concentrate or oil soluble concentrate, to 1 gallon of water or deodorized kerosene.

FOR MOSQUITOES AND SMALL FLYING INSECTS: Indoors - Prepare 2% spray by adding 4.5 ounces of WOODBURY CYTHION 5-E Premium Grade, emulsifiable concentrate or oil soluble concentrate to 1 gallon of water or deodorized kerosene; Outdoors - prepare a 2% to 5% area spray by adding 4.5 to 11.2 ounces of WOODBURY CYTHION 5-E Premium Grade, emulsifiable concentrate or oil soluble concentrate, to 1 gallon of water or deodorized kerosene, or prepare a fogging oil solution by adding 1 part of WOODBURY CYTHION 5-E Premium grade oil soluble concentrate to 28 parts of Mineral Seal Oil or Diesel Fuel No. 2.

FOR FLIES: Prepare a spraying solution by adding 5 tablespoonsful of WOODBURY CYTHION 5-E Premium Grade, emulsifiable concentrate or oil soluble concentrate, to 1 gallon of water or deodorized kerosene.

FOR FLEAS ON DOGS AND CATS: Prepare spraying solution by adding 1 ounce of WOODBURY CYTHION 5-E Premium Grade emulsifiable concentrate to 1 gallon of water.

NOTICE: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.

RECOMMENDATIONS

HOUSEHOLD USE: Aids in the control of exposed accessible stages of ants, centipedes, carpet beetles, clothes moths, crickets, clover mites, earwigs, roaches, pantry pests (such as saw-toothed grain beetle, rice weevil, cigarette beetle, drug store beetle, Indian meal moth) scorpions, silverfish, spiders: Thoroughly spray around doorsills, window frames, wall cracks, baseboards, closets, storage cabinets, openings around water pipes, heat ducts, electrical outlets or wherever these insects may enter, congregate, feed or hide in the home or other building.

FLEAS and BROWN DOG TICKS: Thoroughly spray around doorsills, window frames, wall cracks, baseboards, closets, storage cabinets, openings around water pipes, or wherever these insects may enter, congregate, feed or hide in the home or other buildings plus the sleeping quarters of household pets (dogs and cats) and localized areas of floors and floor covering. Place fresh bedding in the animal quarters following treatment.

BEDBUGS: Apply light spray to all mattress surfaces in sufficient quantity to "mist" the fabric and generously to beds and woodwork, with special care taken to wet all possible hiding places.

MOSQUITOES and SMALL FLYING INSECTS: Indoors, use a space spray with Thiosperse® added, thoroughly misting the rooms, keeping them closed for 5 to 10 minutes. Sweep up and destroy fallen insects.

FLIES: Apply spray at rate of 1 gallon of mixed solution to 1,000 sq. ft. on painted surfaces and 2 gallons per 1,000 sq. ft. on unpainted surfaces where flies alight or congregate. In most cases, adding molasses or sugar to the spray prolongs the insecticidal activity of Malathion and serves as a fly attractant.

DOGS and CATS: Direct Application - Wet the animals thoroughly using a hand sprayer. Repeat applications may be used within 2 to 3 weeks.

ORNAMENTALS: Do not spray on hibiscus, petunias, maidenhair ferns or viburnum lantana as injury may result. Apply sufficient water to obtain full coverage of the entire plant being treated. Repeat applications as necessary for continued control.

OYSTER SHELL SCALE AND LACE BUG: Use 1 pint/100 gallons of water.

SPIDER MITES, WHITEFLY AND THIRPS: Use 1 1/2 pints/ 100 gallons of water.

FLORIDA RED SCALE, JUNIPER SCALE: Use 2 pints/100 gallons. For mixing small quantities: Use 1 teaspoonful of WOODBURY CYTHION 5-E per gallon for each pint used per 100 gallons.

CAUTION: Do not use in milk rooms. Avoid contamination of food, utensils, milk, milk equipment and water. Remove poultry, lactating animals and calves under one month of age from buildings before treating. Do not apply oil-based sprays directly to flowers or other ornamental plants.
