97-0201

February 15, 1990

TERM OF ISSUANCE

Until Reregistration

NAME OF PESTICIDE PRODUCT

Diazinon 50% WP

## NOTICE OF PESTICIDE:

☒ REGISTRATION  
☐ REREGISTRATION

(Under the Federal Insecticide, Fungicide,  
and Rodenticide Act, as amended)

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Victory Chemical Company  
1000 1st St.  
St. Louis, MO 63103

**NOTE:** Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is not to be used in accordance with the label unless it is in compliance with section 3(c)(7)(A) of the Act.

1. Submit a copy of the label required for registration/reregistration to your product under FIFRA, section 3(c)(7)(A) of the Act, and to the registrants of similar products to whom it is required.

2. Add the phrase "EPA Registration No. 97-0201" to the label for you release the product for shipment.

3. Submit a 12-month storage stability study report to the Agency within 12 months of the date of this Registration Notice. The label for the product must be changed for its active ingredient name and similar products to whom it is required. The storage should be at warehouse conditions (70°F and 60% RH) for 12 months. The report should contain information on the stability of the product under these conditions.

### PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**CAUTION:** May be harmful if swallowed, inhaled or absorbed through the skin. Avoid breathing spray mist and provide adequate ventilation of areas being treated. Contact with skin, eyes or clothing should be avoided. Wash thoroughly after using and before eating or smoking. Avoid contamination of food, utensils and food preparation areas.

#### ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds, and other wildlife. Do not contaminate water when disposing of equipment washwaters. Do not apply directly to any body of water. Apply this product only as specified on this label.

#### PHYSICAL OR CHEMICAL HAZARDS

Do not use, pour, spill or store near heat or open flame. During application provide adequate ventilation and if necessary turn off pilot lights in gas appliances and unplug or turn off electrical equipment in the use area. Relight pilot lights and reconnect electrical current after application.

#### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. **STORAGE:** Store product in its original labeled container in a cool, dry, locked place out of reach of children. **PESTICIDE DISPOSAL:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **CONTAINER DISPOSAL:** (Metal) Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities. (Plastic) Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

### CAVALRY BRAND PROFESSIONAL INSECTICIDES

This product contains Dursban® and is a highly effective formulation which provides rapid kill of listed insects including those insects which may have become resistant to certain chlorinated hydrocarbon or phosphate insecticides.

#### HOW TO USE

This product is a Ready-To-Use residual Deo-base oil insecticide to be dispensed by Commercial Applicators. When used as directed, in cracks and crevices, it will give "Pinpoint Control" of insects where they hide, live & breed. **DO NOT USE AS A SPACE SPRAY.** Do not use in or on electrical equipment due to shock hazard.

#### HOW TO APPLY

No. 1. Add the liquid product directly to the sprayer; No. 2. Treat the area by spraying into cracks, crevices, holes and other small openings where insects hide or have been seen.....to give "Pinpoint Insect Control".

#### WHEN TO USE

Treat infested areas any time insects have become a nuisance and repeat in 10 to 14 days, then monthly as needed in warm climates. In addition to rapid contact kill, this insecticide stays on treated surfaces and kills insects for up to two weeks after the spray deposit has dried.

#### HOW MUCH TO USE

For serious insect infestations release a 1 second "spray blast" for each crack & crevice "spot". If possible, separate the injection spots about 12 inches apart. For light infestations or for preventive and maintenance insect control programs space treatments about 2 to 3 feet apart. See additional directions below for control of specific insects.

**NOTICE:** Buyer and user assume all risk and liability of use, storage and/or handling of this product not in accordance to the terms of this label.

## CAVALRY BRAND PROFESSIONAL INSECTICIDE

### "REGIMENT"

A 0.5% Dursban® Ready-To-Use Liquid  
FOR RESIDUAL CRACK & CREVICE TREATMENT

To Be Applied Only By Or Under the Direct Supervision of  
Commercial Applicators Responsible for Insect Control Programs

Apply with a suitable Low Pressurized or Hand Trigger type spray applicator commonly available to the Professional Pest Control Operators trade which delivers a coarse spray droplet pattern.

**KILLS:** Cockroaches, Waterbugs, Spiders, Ticks, Earwigs, Crickets, Sowbugs, Millipedes, Centipedes, Booklice, Silverfish, Ants, Grain Weevils, Flour Beetles, Chocolate Moths, Drug Store Beetles, Boxelder Bugs, Elm Leaf Beetles, Clover Mites, Cluster Flies, Carpenter Ants, Carpenter Bees, and as an aid in the control of Termites.

**FOR USE IN:** Hospitals, Supermarkets, Motels, Hotels, Homes, Transportation Equipment (Buses, Ships, Trains, Trucks, Planes), Utilities, Meat Packing and Food Processing Plants, Food Storage Areas, Restaurants, and other Food Handling Establishments, Schools, Warehouses, & other Commercial Buildings.

#### ACTIVE INGREDIENT:

Chlorpyrifos; [O,O-Diethyl O-3,5,6-trichloro

2-pyridyl phosphorothioate] . . . . . 0.5%

**INERT INGREDIENTS.\*\*** . . . . . 99.5%

**TOTAL** 100.0%

\* Dursban® is a Registered Trade Mark of the Dow Chemical Company

\*\* This product contains a Petroleum Distillate.

### KEEP OUT OF REACH OF CHILDREN CAUTION

#### STATEMENT OF PRACTICAL TREATMENT

**IF SWALLOWED:** Call a physician or Poison Control Center immediately. Induce vomiting by giving victim 1 or 2 glasses of water and touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious or convulsing person. Petroleum Distillate may present aspiration hazard.  
**IF INHALED:** Remove victim to fresh air & empty nostrils if possible. Get medical attention if irritation persists.  
**IF IN EYES:** Flush eyes with plenty of water. Get medical attention if irritation persists.  
**IF ON SKIN:** Remove contaminated clothing and wash affected area with soap and water. Get medical attention if irritation persists.  
**NOTE TO PHYSICIAN:** Causes cholinesterase inhibition. Atropine is an antidote only if symptoms of cholinesterase inhibition are present.

## CRAWLING INSECTS AND WHERE TO KILL THEM

**COCKROACHES, CENTIPEDES, CRICKETS, EARWIGS, MILLIPEDES, SOWBUGS, SPIDERS, BROWN DOG TICKS, WATER-BUGS, PALMETTO BUGS:** Spray into hiding places such as cracks and crevices, openings around pipes, sinks and sewage outlets, under dishwashers and refrigerators, behind baseboards, into voids and wall cracks behind shelves, drawers, and storage closets. Spray directly at many insects as possible. Remove and destroy insect contaminated food sources. Repeat as needed for continued control.

**BOOKLICE AND SILVERFISH:** Spray cracks and crevices in baseboards, door frames, bookcases (if possible remove books and spray shelving), storage & attic areas. Spray directly as many insects as possible. Repeat as needed.

**ANTS:** Spray on to trails, nests, and points of entry around doors, windows, structural cracks and crevices. Spray directly as many insects as possible. Remove and destroy any infested food sources. Repeat as needed.

## STORED FOOD INSECT CONTROL

Observe good housekeeping practices to control stored food insects. Keep food storage areas clean. Always remove contaminated food and destroy. For control of GRAIN WEEVILS, FLOUR BEETLES, CHOCOLATE MOTHS, DRUGSTORE BEETLES, (in exposed adult and larvae stages) and hibernating stages of BOXELDER BUGS, ELM LEAF BEETLES, CLUSTER FLIES, AND CLOVER MITES, contact as many insect as possible when treating infested areas such as cracks and crevices, in food storage cabinets, in wall voids, around windows and door frames, under siding in machinery and in dark secluded areas. Repeat as necessary.

## TO KILL CARPENTER ANTS AND CARPENTER BEES

Localized treatment of wood destroying CARPENTER ANT., and CARPENTER BEES, can be accomplished by locating sources of infestation and injecting 5 to 10 seconds of spray into insect tunnels and cavities. After treatment repair and close all visible insect tunnel openings.

## INSECT CONTROL APPLICATIONS WITHIN FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS

Limited to crack and crevice treatment only. Apply a small amount of material into cracks and crevices such as expansion joints between different elements of construction or between equipment bases and the floor, wall voids, soffits, and conduits or hollow equipment legs where insects hide. Care should be taken to avoid depositing the product into exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces. Application of this product in the food areas of food handling establishments, other than as a crack and crevice treatment, are not permitted. For list of insects see CRAWLING INSECTS paragraph RESTRICTIONS - Avoid or treat sparingly all plastic, rubber and asphaltic surfaces such as edges of tiles and floor covering since damage may occur in the way of "softening". Do not spray on plastic, painted or varnished surfaces or directly into any electrical equipment such as radios, televisions, computers, etc. Carpeting may be stained with this product; do not treat.

**FOR USE AS AN AID AND SUPPLEMENTAL SPRAY  
AGAINST TERMITES**

The purpose of applying this product is to kill workers or winged reproductive forms which may be present in the treated channels and spaces at the time of treatment and to impart a temporary resistance at these places to termite attack which may aid in some part, in prevention of immediate reinfestation by termites. Such applications are not a substitute for mechanical alteration, soil treatment or foundation treatment but merely a supplement, particularly where use of other insecticides may pose an odor problem. **IMPORTANT:** Do not apply solution until location of heat or air conditioning ducts, vents, water and sewer lines and electrical conduits are known and identified. When located, applications may be made around these structures. However, caution must be taken to avoid contamination of these structural elements and airways. Observe and follow the **PHYSICAL OR CHEMICAL HAZARDS** statements on this label.

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, the following pesticide is registered:

9782-69
