

MUNI-KILL is specifically formulated for non-selective chemical control of many annual and perennial grasses and weeds. MUNI-KILL should be used only on non-crop areas, including rights of way, road shoulders, parking lots and industrial sites. The amount of control and length of time it will be effective varies according to the quantity of MUNI-KILL applied, rainfall, type of soil, and climatic conditions. MUNI-KILL is especially useful in municipal weed control and as a soil sterilant.

DIRECTIONS:

For controlling weeds and grasses in non-crop applications for an extended time, use 43.5 gallons of MUNI-KILL per acre after the weeds have sprouted. No dilution nor agitation is necessary. MUNI-KILL may be applied by using truck mounted standard spraying equipment. In treating small areas, MUNI-KILL may be applied with a tank-type sprayer, or a sprinkling can.

Consult local, state or federal authorities for recommendations for use in a particular area, or contact MuniChem representatives.

CAUTION:

Do not apply MUNI-KILL directly to, or otherwise permit it to come into contact with susceptible plants such as vegeta-

bles, flowers, fruit trees, ornamentals, cotton, grapes or other desirable plants. Do not apply to areas underlaid by roots of desirable plants. Do not permit spray mists containing MUNI-KILL to drift onto these plants. (Coarse sprays do not drift as readily).

Vapors from MUNI-KILL may affect susceptible plants in the immediate vicinity. Clean spraying equipment thoroughly with a suitable chemical cleaner before storing or using for other purposes. Do not store near seeds, fertilizers, insecticides nor fungicides. Avoid contaminating water used for irrigation or for domestic purposes. Do not use this container for other materials until it has been thoroughly cleaned.

DANGER:

Harmful or fatal if swallowed or absorbed through skin. Vapor Harmful! Causes skin irritation! Do not breathe vapor or mist. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling. In case of contact, wash skin with soap and water; flush eyes with large amounts of water for at least 15 minutes and get medical attention. Remove and wash contaminated clothing before re-using. **KEEP OUT OF REACH OF CHILDREN.**

MUNI-KILL is poisonous to fish. Keep out of lakes, ponds and streams. Do not apply in any manner not specified on label.
