SIDE PANEL

MUNI-FOG LIQUID INSECTICIDE

DIRECTIONS HOW TO USE

MUNI-FOG was developed for municipalities and large users of outdoor insecticides. It is an oil soluble chemical that is specifically recommended for heat combustion fogging machines. When diluted with up to 14 parts of petroleum solvent the operator can be assured of excellent results. Certain outdoor climatic conditions will limit the residual effect of MUNI-FOG.

MUNI-FOG will even kill insects that have built up a resistance to chlorinated insecticides such as DDT. MUNI-FOG is formulated for the temporary control of flies, mosquitoes, and certain other small flying insects.

CAUTION: Harmful if swallowed. Avoid contamination of feed and food-stuffs. Avoid breathing spray mist. Contact with skin can cause toxic symptoms. In case of contact with skin, wash with soap and water. Do not apply or allow to drift to areas occupied by unprotected humans or beneficial animals. Do not allow material to contaminate water used for irrigation, drinking or other domestic purposes. Do not use on humans nor on household pets. Do not spray on shrubs and other ornamentals.

DESCRIPTION: A light colored liquid insecticide for outdoor use. It is a water and oil soluble chemical insecticide that is specifically recommended for heat combustion fogging machines. MUNI-DOG is a concentrated product that can be used effectively at 1 part to 14 parts petroleum solvent dilution.

CHARACTERISTICS:

1. MUNI-FOG when mixed with a petroleum solvent is an insecticide suitable for outdoor fogging machines.
2. MUNI-FOG will kill insects that have built up a resistance to DDT.
3. MUNI-FOG can be diluted 1 part product to 14 parts petroleum solvents or water.
4. MUNI-FOG is formulated for the temporary control of flies, mosquitoes and certain other small, flying insects.
5. MUNI-FOG, diluted with a petroleum solvent remains temporarily active after application under certain climatic conditions.

USES: For control of insects out of doors.

USERS: Municipalities, schools, parks, golf clubs, recreational areas, highway departments, industrial plants in outdoor applications.

SIDE PANEL

DIRECTIONS FOR USE: Dilute MUNI-FOG with up to 14 parts petroleum solvents and apply with any good fogging machine. Can also be diluted with up to 14 parts water and applied with a misting machine.

APPLICATION: Use any good hand or truck mounted heat combustion fogging machine or misting machine.

Highly toxic to fish and wildlife. Do not contaminate fish ponds and fish bearing waters.
