PORCELAIN CLEANER

Directions for cleaning acid resistant porcelain

This product can be used to clean rust, scale and accumulated soil from bathtubs, lavatories, shower stalls, etc. Use only on acid resistant porcelain!

Dilute this concentrated cleaner with 2 parts of water. Using sponge or swab, brush solution on desired area, and then immediately flush entire surface with water. Do not permit solution to remain on porcelain, and do not set container on the porcelain surface. Repeat above on stubborn stains.

POISON

(Contains Dilute Solution Hydrochloric Acid)

CAUTION: Harmful if swallowed. In case of contact with eyes, flush with cold water for several minutes. Do not breathe vapor or fumes. May produce irritation. Avoid getting in eyes, on skin or on clothing.

ANTIDOTE

External: Flood surface with water, using soap freely.

Internal: Drink magnesia, chalk, whiting, or small pieces of soap in water, milk, or raw egg white.
