

PRODUCT OF ANTHONY POOLS
WORLD'S LARGEST POOL BUILDER

antho-pure

CHLORINE CONCENTRATE

Active Ingredient: 95% Sodium-Dichloro-s-Triazinetrione.
Inert Ingredients: 5% by Wt.

Harmful if swallowed — Dry product will irritate eyes.
Read cautions and antidote statement on the right panel.

antho-pure

Keep your pool water clear...
If the water is green,
the pool is clear and sparkling

POOL CHLORINE CONCENTRATE

Dissolves in water, contains
no calcium or scale-forming
minerals, leaves no residue.

Phil Anthony suggests these rules for good pool care

Use a reliable test kit regularly to
check for pH and chlorine residual.
To avoid a false reading check pH only
when chlorine residual is less than
0.8 ppm.

Keep pH between 7.4 and 7.6.
When water temperatures are above

75°F, pool should be super-chlorin-
ated every two weeks. Follow step
number 5 of directions on other side
panel. Super-chlorination is needed
to destroy ammonia and control algae
if chlorine residuals are not main-
tained or filtration is not ideal.

ingredient in
Antho-Pure Chlorine
Concentrate
reduces wasteful
chlorine loss
due to sunlight.*

In its concentrated form this
product by law must display the
following warning. In the dilutions
recommended it is not classified
as harmful.

WARNING: Do not take internally.

Keep out of eyes and off skin. Avoid
inhalation of dust. Oxidizing mate-
rial: do not mix with other chemi-
cals. Contact with organic matter
may cause fire. Will burn with
evolution of chlorine or equally

toxic gases. Store in cool place.
ANTIDOTE: Internally—feed bread
soaked in milk followed by olive oil
or cooking oil. Externally or in
eyes—immediately flood with cold
water. **CALL A PHYSICIAN**

is always pure and sparkling**

DIRECTIONS
Antho-Pure Chlorine Concentrate will have maximum effectiveness after pool water has been properly conditioned. If pool is newly filled or if a different method of chlorination has been used, prepare pool by using Antho-Pure Conditioner first.

CONDITIONING
1. Backwash or clean filter and set for eight hours continuous operation. (With sand and gravel filters - do not add alum for 24 hours.)
2. Test pH level with a test kit. Adjust the pH to 7.4-7.6. Add Soda Ash or Bicarbonate of Soda if pH is below 7.4 - if it is above 7.6 add Antho-Pure Dry Acid.
3. Add Antho-Pure Conditioner in the amount shown in table. With filter on, main drain off, and skimmer valve open, add the Antho-Pure Conditioner slowly into the skimmer, breaking up lumps that may form.
4. Test in 1 to 2 hours, repeat a treatment of pH to 7.4-7.6 as in step 2.
5. Super-Chlorinate. Add one gallon of pool chlorine (10-14% sodium hypochlorite) by

weight) per 20,000 gallons of pool water. Super-chlorination should always be done when there are no swimmers in the pool and no one should be allowed in the pool until the chlorine residual has dropped below 2.0 ppm. Do not allow the residual to go below 0.5 ppm.
6. Next day, check chlorine residual. If it has not returned at least to 0.5 ppm residual, super-chlorinate again as in step 5 with a 1/2 gallon of liquid pool chlorine per 20,000 gallons of pool water.

AFTER CONDITIONING
1. Add Antho-Pure Chlorine Concentrate every other day to maintain a 0.5 ppm residual. See chart for amount.

ANTHO-PURE CHLORINATOR - Holds 20 pounds of Antho-Pure Chlorine Concentrate. Add measured amount daily. Follow Chlorinator instructions for setting and use.

FOR AUTOMATIC LIQUID FEEDERS: Prepare a stock solution by dissolving 10 lbs. Antho-Pure Chlorine Concentrate in 5 gallons of water. Adjust to maintain a 4.0-4.5 ppm residual.

POOL CHLORINE CONCENTRATE

NET CONTENTS: 16 2 OZ. PACKETS

Active Ingredient: 95% Chlorine
Contains 16 2 oz. packets of Chlorine Concentrate

For maximum effectiveness of Antho-Pure Pool Care Program...

Use ANTHO PURE CONDITIONER just one time. Then use a few ounces of ANTHO PURE POOL CHLORINE CONCENTRATE every other day.

- KEEPS YOUR POOL WATER PURE
Prevents algae and other contaminants from growing.
- DISSOLVES IN WATER
No need to stir. Simply add to your pool.
- CUTS CHLORINE LOSSES DUE TO SUNLIGHT
A 10% chlorine loss is common. Antho-Pure Pool Chlorine Concentrate helps to prevent this loss.

For more information on the benefits of the Antho-Pure Pool Care Program, contact your local pool dealer or write to Anthony Pools, Inc., Dept. 100, P.O. Box 100, Dallas, Texas 75201.

WARNING: This product is highly concentrated. It is not to be used on any surface other than swimming pool water. It is not to be used on any other surface. It is not to be used on any other surface. It is not to be used on any other surface.

Store in cool place.

ANTIDOTE: If swallowed, drink water. If in eyes, flush with water. If on skin, wash with water. If inhaled, get fresh air. If symptoms persist, CALL A PHYSICIAN.
