**GENERAL CLASSIFICATION**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Add two ounces per gallon water.

Apply OVER-ALL to walls, floors and other hard surfaces such as tables, chairs and bed frames with a cloth or mop.

At two ounces per gallon use-level, OVER-ALL is effective against Staphylococcus aureus, Salmonella choleraesuis, Escherichia coli and Trichophyton interdigitale, the athlete's foot fungus. Germicidal performance against the first three organisms has been confirmed by the AOAC Use-Dilution Test. Fungicidal performance against T. interdigitale was determined by the AOAC Fungicidal Test.

\*At two ounces per gallon use-level, OVER-ALL is virucidal against Herpes Simplex (a member of the virus family that causes infectious mononucleosis), Vaccinia (representative of the pox viruses) and Influenza A, as represented by the strains commonly called the Hong Kong Flu and the London Flu Virus, on inanimate environmental surfaces.

Note: This product is not effective against Pseudomonas at this use-level.

For sanitizing add one ounce per gallon of water.

Use OVER-ALL for sanitizing and cleaning utensils, equipment and other hard surfaces. When sanitizing food processing equipment and utensils and food contact surfaces, no potable water rinse is required.

OVER-ALL is an industrial cleaner which disinfects as it cleans. It is especially designed for schools, institutions and industry. A single application removes dirt and grime, disinfects and is virucidal. When used as directed, the hard surface disinfecting action of OVER-ALL will reduce the hazard of cross-infection.

OVER-ALL is an extremely effective one-step sanitizer. It cleans and sanitizes in waters up to 1000 ppm hardness with no potable water rinse required. This hard water tolerance is in excess of most potable waters and will insure complete sanitizing action when used as directed.

When used as directed, OVER-ALL will deodorize toilet areas, behind and under sinks and counters, garbage cans and garbage storage areas, and other places where bacterial growth can cause mal odors.
