CRAWLING INSECTS:

[9838-2] 2 of 2

For control of roaches, waterbugs, silverfish, crickets, spiders, and brown dog ticks, thorough and repeated spraying of the infested area, directing the spray into cracks and other hiding places, is recommended. Emphasis should be placed on hitting the insects directly, and on repeated applications.

For controlling ants follow above directions for control of roaches, but similar emphasis should be placed on the treatment of ant trails and areas around door sills and window frames where the pests enter the premises. Repeated applications are required in all cases. For the control of fleas in premises follow directions for coverings, and wall cracks, as well as sleeping quarters of animals.

For control of carpet beetles spray thorough application to infested areas of carpets, localized areas of floors and baseboards, and into cracks and under carpets, where these pests may be found. Localized treatments of areas on floors, baseboards and shelves of closets may also be indicated. Repeat application as often as necessary to maintain effective control.

NOTICE: The Manufacturer and Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.

DO NOT USE OR STORE NEAR HEAT OR OPEN FLAME

DO NOT REUSE CONTAINERS. DESTROY WHEN EMPTY.

USE PRESENT CONTAINER ONLY.  
DO NOT REUSE

CAUTION: Keep Out of Reach of Children
