

DIRECTIONS FOR USE

For most effective results against the active stages of running and crawling insects, use in a good sprayer adjusted to deliver a coarse wet spray.

Treat infested areas thoroughly and whenever possible, keep doors and windows closed for 10 minutes after spraying.

Flying Insects: For control of flies, fruit flies, mosquitoes, gnats, sand flies, etc. the spray toward the upper portions of the room and saturate the atmosphere with a fine mist spray using 1 to 2 ounces to each 1000 cubic feet of space.

Crawling Insects: To control roaches, silverfish, crickets, and spiders, spray infested areas with a coarse wet spray thoroughly and direct the liquid behind baseboards, moldings, cabinets, shelves, sinks, door and window frames, and pipes, toward drains and dark corners, and into cracks, crevices, recesses and similar hiding places.

Against ant infestations, treat shelves, cabinets and storage areas; spray ant runs, trails, baseboards, thresholds and other places of entry, and treat nests liberally.

In controlling fleas and Brown Dog ticks in houses, direct the application toward the lower wall portions, baseboards, rugs, carpets and floors of infested areas. Animal quarters, kennels and bedding should also be sprayed.

To control bedbugs effectively, apply liberally to top, ends, sides and bottom of mattresses, spraying thoroughly all tufts, seams and folds. Spray springs and frame, directing the liquid into all cracks and lock joints. Treat walls, baseboards, moldings, floors, closets and bedroom furniture, picture frames, with particular attention to protected bedbug hiding and breeding places.

Not Reviewed. Registrant claims to be in accordance with the registration of this product for use as a general purpose insecticide for use in homes, restaurants, and food processing plants. See 40 CFR 155.101(a)(1) for more information.

For most effective control of clothes moths and carpet beetles, remove infested articles from storage, brush thoroughly and, if possible, air several hours in direct sunlight. Apply spray liberally in empty chests, closets, bureaus and storages, directing the liquid into cracks, joints and crevices. After airing, infested articles may be treated by holding the spray nozzle at least 3 feet away from the fabric and applying the liquid lightly to the seams to avoid the possibility of staining. Treat both sides of rugs, carpets and pads, and all exposed and accessible surfaces of overstuffed furniture. Do not overspray if products are made of rubber or are rubber coated, to prevent expansion or swelling. Repeat treatments monthly unless the articles are stored in moth-tight containers.

Home and Institutional pantries and food storages frequently become infested with granary weevils, rice weevils, confused flower beetles, rust red flower beetles, saw-toothed grain beetles, augoumois grain moths and Mediterranean flower moths. To avoid sources of reinfestation, wormy flour, grain and cereals should be destroyed before treatment. Spray thoroughly all surfaces of shelves, bins, cupboards, cabinets, pantries, lockers and similar storages, with particular attention to cracks, niches, crevices and other hiding places.

General Purpose Insect Spray is an excellent insecticide for use as a vapor, fog or mist spray in special generators. Regulate dosage in accordance with equipment manufacturers' directions for the particular type of applicator employed. Application should be sufficient to fill the enclosure with the fog, mist or vapor.

STORAGE & DISPOSAL

Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

ONLY FOR SALE TO, USE, AND STORAGE BY SERVICEPERSONS.
