

[9852-30]

To kill flies, including fruit flies, mosquitoes, gnats, small flying moths, wasps and hornets: Close windows and doors and shut off all ventilating systems. Remove pets, birds and cover fish aquaria before spraying. Apply as a fine mist using a non-thermal sprayer. Thoroughly fill the area with mist with special attention to light sources which attract these insects, as well as ceiling areas and dark corners. Vacate treated area. Keep the treated area closed for 15 minutes. Ventilate area well before re-entry, sweep up and destroy all fallen insects. Repeat treatment as necessary.

Wasps and hornets: Application should be made in late evening when insects are at rest. Spray into hiding and breeding places contacting as many insects as possible.

CAUTION: Harmful if swallowed. Foods should be removed or covered during treatment. Any food processing surfaces should be covered during treatment or thoroughly cleaned before using. Do not apply as a space spray while food is being prepared.

This product may be toxic to fish. Keep out of lakes, streams or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply only as specified on this label.

Do not reuse this container. Destroy by perforating or crushing and burying in a safe place.

COMPACTOR AND KITCHEN INSECTICIDE WITH ODOR DEACTANT

EPA Reg. No. 9852-30

Special Low-Oil Formulation

For Use In Industrial and Residential Garbage Compactors, Garbage Chutes, Kitchen Garbage Cans, and other Kitchen Locations.

A PYRENONE[®] Insecticide — Leaves No Objectionable Residues.

The insecticidal components of this spray are classified as food additives and when used as directed, allowable tolerances will not be exceeded.

ACTIVE INGREDIENTS:

Pyrethrins.....	0.12%
*Piperonyl Butoxide, Technical.....	1.20%
Petroleum Distillate.....	48%

INERT INGREDIENTS:.....98.20%

*Equivalent to 0.96% (butylcarbityl) (6-propylpiperonyl) ether and to 0.24% of related compounds.

CAUTION

KEEP OUT OF REACH OF CHILDREN

DIRECTIONS FOR USE

For rapid control of roaches, ants, spiders, crickets, silverfish, centipedes, cheese mites, meal worms, confused flour beetles, red flour beetles, granary weevils, and rice weevils: Apply in a good sprayer adjusted to deliver a coarse wet spray, at a rate of 1 gallon to 750 square feet of space. Direct spray into locations where these insects are found: garbage compactors, garbage chutes and cans, into cracks and crevices, dark corners, behind and beneath sinks, stoves, refrigerators, and cabinets, along baseboards, and around door and window frames. Spray ant trails, nests and points of entry. Spray insects directly wherever possible.

In case of infested foods in cabinets, dispose of the infested material. (Treatment in commercial or industrial areas of stored food products should include treatment by other effective methods using an approved product intended for this purpose.) Remove all infested material and clean thoroughly. Spray interior surfaces of empty cabinets thoroughly. After spray has dried, cover shelves with paper or otherwise protect foods from direct contact with sprayed surfaces. Any utensils that are contacted by this spray should be thoroughly washed before using.

Repeat treatment if reinfestation occurs.

Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product in these areas, apply only when the facility is not in operation.

ACCEPTED

NOV 14 1975

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under 9852-30
