PLAINVIEW, NEW YORK 11803

DIRECTIONS FOR USE

(1) The insecticide shall be dispensed in the amount of not less than 5 grams each 1,000 cu. ft. of enclosed space in the aircraft and shall be released or sprayed throughout all accessible compartments. When valve is fully depressed, material is dispensed at approximately 1 gram per second.

(2) Disinsectization may be accomplished either while the aircraft is in flight or while on the ground prior to take-off, but in no case shall disinsectization be accomplished later than 30 minutes prior to the first landing at a United States port.

(3) The ventilation system shall be stopped and all openings to the exterior kept closed while the insecticide is being released or sprayed, and for a period of not less than 3 minutes thereafter if disinsectization is accomplished on the ground prior to take-off, the ventilation system may be opened at the end of such period provided that the system is equipped with filters or other means for preventing the entrance of insects into the aircraft, but doors, windows, or other such openings to the exterior shall be kept closed until after the take-off, except in the case of emergency, or to permit persons applying the insecticide to debark.

USE NO GREATER DOSAGES THAN
REQUIRED. EXCESSIVE SPRAYING
IS WASTEFUL.
