## DIRECTIONS FOR USE:

### GENERAL USE CLASSIFICATION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

### APPLICATION

This product is formulated to control growth of many of the organisms which cause biological fouling in cooling towers and evaporative condensers.

Prior to use of "Aqua-Tech" TSC-905, systems must be cleaned to remove algal growth, microbiological slime and other deposits.

An initial dose of 2 quarts "Aqua-Tech" TSC-905 per thousand gallons of water in the system should be added at a point of rapid circulation. Repeat periodically as needed.
