

Insect Repellent Kraft Paper

Active Ingredients

Pyrethrins	.033%
*Piperonyl Butoxide	.33 %
*(butylcarbityl) (6-propylpiperonyl) ether	
Related Compounds	.046%
<u>Inert Ingredients</u>	99.591%

Active ingredients above indicate residue after 5 months storage of insect repellent kraft paper originally treated with  $50 \pm 10$  mg/sq. ft. piperonyl butoxide, and  $5 \pm 1$  mg sq. ft. pyrethrins on one surface of the paper. The treated side shall be indicated by the roll labeling. The treated side of the 60-lb./ream kraft paper shall form the outer surface of the finished package and be separated by at least two plies of untreated papers from the contents of the package. This treatment increases resistance to penetration by insects for a period of 9 to 12 months under normal shipping, handling and storage conditions. For maximum effectiveness, IR kraft must be fabricated into the package within 5 months of the date of application.
