

**PROCEDURE**

Place the article to be treated in an air-tight area or container, if possible. Sprinkle flakes generously throughout the area of container for positive protection during storage periods. If used in a clothes closet or small room, we suggest hanging the can with holes punched in it from the clothes bar or lining the articles to be protected one pound per 100 cubic feet of tight closed space should be used in closets, chests, trunks, storage boxes, etc. The space should be kept tightly closed at all times and for at least seven days after addition of the flakes. If containers or spaces are opened occasionally more flakes should be added and the container or space tightly closed again for at least seven days. Woolens should be thoroughly brushed or cleaned before storing.
