

HAZARD TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed. Avoid breathing vapor. Avoid contact with skin, eyes, or clothing. Wear mask or respirator recommended by NIOSH for protection. Wash exposed skin with soap and water after using.

Do not apply while food processing is under way. Exposed edible products should be removed, covered or stored in closed containers. Facilities and equipment in federally inspected meat and poultry plants must be washed with an effective cleaning compound followed by a potable water rinse after spraying.

Remove pets and birds, and cover fish aquariums before spraying.

STORAGE AND DISPOSAL

Do not store in direct sunlight, or near heat such as an open flame. Do not use toward an open flame. Do not contaminate water, food, or feed by storage or disposal.

CONTAINER DISPOSAL Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by public disposal trucks (California).

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Space spray: For control of accessible, exposed stages of flies, including fruit flies, mosquitoes, small flying moths, gnats, wasps, hornets, cheese skippers, and these common stored product pests: granary weevils, rice weevils, confused flour beetle, saw-toothed grain beetle, spider beetle, cigarette beetle, Drugstore beetle, Angoumois grain moths, Mediterranean flour moths, Indianmeal moths, Tobacco moths, meal worms, and grain mites; Close windows and doors and shut off ventilating systems. Use a fogger or vaporizer adjusted to deliver an aerosol spray (no droplets over 50 microns in diameter

and 80% less than 30 microns). Apply at rate of 1 ounce per 1000 cubic feet of space. Direct the spray toward the ceiling and upper corners of the area and behind obstructions. For best control of wasps and hornets, apply directly to the nests in the evening. Keep the area closed for at least 15 minutes. Vacate the treated area and ventilate before reoccupying. Repeat treatment as necessary.

Space and Contact Spray: For control of accessible, exposed stages of silverfish, crickets, roaches, spiders, scorpions, clover mites, cheese mites, earwigs, and ants, first using equipment which can deliver a pin spray, direct spray into all cracks and crevices in the woodwork, walls, floors, underneath sinks, behind pipes and in all places where these insects are known to seek shelter. Contact as many insects as possible. Spray directly all ant trails. Do not allow spray to contact food. Then, shutting all doors, windows, and shutting off all ventilating systems, proceed with space spraying in directions as given above. Use a dosage rate of 1 ounce per 1000 cubic feet of space. Keep the area closed for at least 15 minutes. Vacate the treated area and ventilate before reoccupying. Repeat treatment as necessary.

In mushroom production and processing: To control mushroom flies or fungus gnats in growing houses apply at a rate of 1 ounce per 1000 cubic feet of space. Fogger should be operated 8 to 10 feet away from beds and directed slightly upward over them. Circulating fans should be left in operation, but for best results, refrigeration should be turned off. In packing and canning plants, use at a rate of 1 ounce to 2000 cubic feet of space.

Designed for use in Edible Product Areas of Official Establishments Operating Under the Meat, Poultry, Shell Egg Grading and Egg Products Inspection Programs and in Other Food Processing Plants.

Apply with Equipment Designed and Adjusted to Deliver a True Mist.

Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.
