## SUPER STARCIDE

Insecticide

### Active Ingredients:

Pyrethrins	.1875%
*Piperonyl butoxide, Technical	.3750%
N-octyl bicycloheptene dicarboximide	.4250%
Petroleum Distillate	98.9125%
Total	100.0000%

\*Consists of .3% (butylcarbityl (6-propylpiperonyl) ether and .075% related compounds.

**CAUTION:** KEEP OUT OF REACH OF CHILDREN. SUPER STARCIDE is a combustible mixture. Do not store, pour or use near heat or open flame. Harmful if swallowed.

SEE SIDE PANEL FOR ADDITIONAL CAUTIONS

### LEFT PANEL

SUPER STARCIDE is formulated with pyrethrins (nature's own insecticide) and two synergists, N-Octyl bicycloheptene dicarboximide and technical piperonyl butoxide, which tremendously boost knockdown and kill. SUPER STARCIDE, formulated with a deodorized base, is particularly applicable in areas where old-fashioned, smelly bug sprays cause discomfort - even nausea - because of strong odor. SUPER STARCIDE is excellent for use in areas where food is handled.

**CAUTION:** Do not use in nurseries or rooms where infants, ill or aged persons are confined. SUPER STARCIDE can be used as a space spray in food processing plants only when the plant is not in operation. All foods should be removed or covered during treatment. All food processing surfaces should be covered or thoroughly cleaned before using.

### DIRECTIONS FOR USE:

**FOR ROACHES, WATERBUGS, SILVERFISH,** and certain other crawling insects. Use a coarse wet spray that will not float in the air. Direct spray in such a manner as to penetrate all cracks, crevices and other hiding places. Contact directly as many insects as possible. Wet thoroughly around shelves - under sinks, refrigeration equipment, dishwashing machines and bottle washers. Treat all returned bottle cartons and cases. Repeat application frequently.

**FOR FLIES, MOSQUITOES AND GNATS.** Close room and turn off air conditioning or ventilation systems before fogging. Remove exposed food. Cover food handling equipment to prevent contamination from spray. For best results in large areas, disperse with an electric sprayer, but hand or compressed air sprayers may be used. Direct spray toward the ceiling and continue spraying until area is thoroughly fogged. Leave room closed for at least 15 minutes after spraying. Remove and destroy dead insects. Repeat SUPER STARCIDE application as often as necessary.

SUPER STARCIDE is recommended for use in restaurants, hospitals, hotels, motels, bottling plants, food plants, supermarkets, bakeries, warehouses, railroad boxcars, granaries -- wherever food products are made, stored, shipped or handled.
