Based on Outer Ply of Sack

Active Ingredients:

| | |
|--------------------------------|--------|
| * Piperonyl Butoxide Technical | 0.33% |
| Pyrethrins | 0.033% |

Inert Ingredients:

| | |
|-------------|----------|
| Kraft Paper | |
| Starch | |
| Clay | 99.637% |
| | 100.000% |

99231

*Equivalent to .264% (Butylcarbityl) (6-propyl-piperonyl) ether and .066% related compounds.

Active ingredients above indicate residue after 5 months' storage of IRT Sacks originally treated with 50±10 mg/sq. ft. piperonyl butoxide technical, and 5±1 mg/sq. ft. pyrethrins on the outer surface of the outer ply of basis weight 60 lb. per 3,000 sq.ft. ream. Treatment increases resistance to penetration by insects for a period of 9 to 12 months under normal shipping, handling and storage conditions. Tight end closures and specially designed longitudinal seam assist in protecting the contents, providing the sack is otherwise intact. For maximum effectiveness, IRT sacks must be filled within five months of the date of fabrication.

The outer ply of this shipping sack has been treated with synergized pyrethrins to increase its resistance to penetration by insects under normal shipping, handling and storage conditions. Tight end closures and specially designed longitudinal seam assist in protecting the contents, providing the sack is otherwise intact. This sack has been registered with the United States Department of Agriculture under USDA Reg. No. _____.
