WS-50

WEED SPRAY

WS-50 WEED SPRAY is recommended for killing and controlling unwanted broad-leaved weeds, ferns, and lumber vines, and is a most effective way to prevent an infestation of your farm or garden.

Use **WS-50 WEED SPRAY** with care. Use these directions: Make use of a pump sprayer or other device for spraying. This spray is for use on broad-leaved weeds. Spray on a clear, calm day to ground level when plants are in the leaf and bud stage to 2 weeks before first expected frost in the area. For best results, a stronger mixture should be used.

Weeds in your garden are best controlled with **WS-50 WEED SPRAY** by diluting with water to obtain an emulsifiable spray mixture.

WS-50 WEED SPRAY with the addition of water for herbicide. Apply this spray to the weeds and vines.

Said treatment may be repeated with a weaker solution if necessary.

For the handling, storage, or use of this product for any reason except the label of the material, conform to the chemical description of the chemical and any other information on the label of this product to conform to the description of the chemical and any other information on the label of this product. Do not include any other information on the label of this product.

CAUTION

Do not inhale or swallow or absorbed through skin. Causes skin irritation. Do not breathe vapor or spray mist. Do not get in eyes, on skin or on clothing. Wash thoroughly after handling.

In case of contact with eyes, flush immediately with plenty of water. If swallowed, drink plenty of water. If on skin, wash with plenty of water. If on clothing, wash with plenty of water.

Keep out of reach of children. Do not use in areas where children play. Do not use in areas where food is prepared or stored. Do not use in areas where food is consumed. Do not use in areas where food is stored.

ANTIDOTE

EXTERNAL: Wash with plenty of water. If on skin, wash with plenty of water. If on clothing, wash with plenty of water.

INTERNAL: Drink plenty of water. If swallowed, drink plenty of water. If on skin, wash with plenty of water.

DIRECTIONS FOR USE

Initial Dose: 1 Gallon Swimicide to 50,000 Gallons of Water. Maintenance Dose: 1 quart Swimicide to 50,000 Gallons of Water.

Initial dose is used when filling pool at beginning of swimming season. If pool has visible algae growth, treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or reappear, repeat this treatment procedure as necessary. When Pool is free of visible algae, use the recommended maintenance dose.

Maintenance dose should be added at 3-5 day intervals. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently.

If make-up water is added at the rate of more than 10% per week of pool capacity, add 1 quart of Swimicide for each 10,000 Gallons of fresh make-up water added per week.

When swimming season is over, add 1 gallon of Swimicide to 50,000 gallons of water to destroy any soft-bodied organisms that have been overwintering in the pool. This will help prevent the return of algae and other organisms in the spring.

DANGER

KEEP OUT OF REACH OF CHILDREN.

SEE OTHER WARNINGS ON SIDE PANEL.

EP-60 (Rev. 10-74) 36

SOUTHERN PRODUCTS COMPANY
1301 Heistan Pl. 1101 So. 6th St.
Memphis, Tenn Nashville, Tenn.

When Swimicide is used as directed, it will prevent development of chloridis pyrenoidosa (green), Phormidium mundum (black algae), Lyngbaversicolor (blue), and other swimming pool algae.

Swimicide is compatible with most commonly used swimming pool chemicals, but should not be mixed with soap or other cleaners, or premixed with other water treating chemicals. Swimicide works best when added by itself directly to pool water. Swimicide at use dilution is non-corrosive to inanimate surfaces.

DANGER

Keep out of reach of children. Causes severe eye and skin damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or other water.

FIRST AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. If in eyes, call a physician. Remove and wash all contaminated clothing before reuse. If swallowed, do not induce vomiting. Get medical attention.
