

PETERSENS

Gopher - Rodent Killer

DANGER

ANTIDOTE

Call a Doctor **IMMEDIATELY!** If less than 10 minutes has passed since Poison taken by victim, give a tablespoon of salt in warm water. Have victim lie down in a quiet, darkened room and keep him warm.

INSTRUCTIONS

POCKET GOPHERS:

Hand Application - Locate Burrow by probe several inches away from mound, pour in one or two tablespoons of bait and cover opening securely with a piece of sod. Bats need not be placed near every mound but each separate burrow should be baited in two places. (See further directions enclosed in bag).

Machine Application (burrow builder) - Make artificial burrows same depth as natural ones, about 20 feet apart dropping bait spaced 9-12 inches apart. About 2 lbs. of bait per acre. Adjust machine so that it rides the ground with wheels barely packing soil. (See further instructions enclosed in bag).

JACK RABBITS:

Construct flat topped earthen mounds 18" in diameter and 4" high, about 10 feet apart in fence rows or turnrows near rabbit trails where they come from pasture to crop lands. Place one or two tablespoonful on each mound. "Consult your State Fish and Game Agency for more information on this product."

NOTICE

Buyer assumes all risks of use, storage or handling of this product. See label for full directions with directions given herewith.

Active Ingredient - Strychnine	10.00
Inert Ingredients	90.00
TOTAL	100.00
