**ANTIDOTE**

Call a Doctor **IMMEDIATELY** if less than 10 minutes has passed since Poison was taken by victim, give a tablespoon of salt in warm water. Have victim lie down in a quiet darkened room and keep him warm.

**ENVIRONMENTAL HAZARD**

This product is toxic to fish, birds, and other wildlife. Do not allow this to be exposed to soil, surface water, or groundwater. Do not apply where rain is likely to occur. Do not contaminate water by cleaning of equipment or disposal of waste. Do not use on areas treated with other pesticides. Apply this product only as specified on this label.

**INSTRUCTIONS**

**FLAINS POCKET GOPHER** (*Citellus burrows*) and **Northern Pocket Gopher** (*Thomomys talpoides*)

**Hand Application:** Locate burrow by probe several inches away from mound, push in one (see label) until all loose soil is secured with a piece of soil. Bait need not be packed, use every mound but each separate burrow system should be baited in its place. Spilled bait must be picked up or buried (See further directions enclosed in box) before applying.

**Machine Application (burrow-baiter):** Make artificial burrows same depth as nature burrows about 12 to 18 inch apart. About 10 lb of bait per acre. Adjust machine so that it rips the ground with wheels barely packing soil. To build a proper burrow the soil must be damp and the machine secured. Proper artificial burrows do not cave in regularly when walked on. Spilled bait must be picked up or buried. When not in use do not leave bait in the dispensing mechanism of machine (See further instructions enclosed in box) before applying.

**NOTICE**

Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.

Active Ingredient - Strychnine	0.80%
Inert Ingredient	99.20%
