DIRECTIONS FOR USE GENERAL CHLORINATION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DIRECTIONS FOR SWIMMING POOL CHLORINATION

For a new pool or for spring start-up, superchlorinate with one (1) pint (16 fl. oz.) of Jersey Chemicals Chlorinating Solution for each 3200 gallons of water. This dosage is equivalent to 5 ppm available chlorine by weight.

FOR POOL MAINTENANCE

A) Adjust pool water pH to 7.2-7.6 range and maintain.
B) Add gradually or by a feeder device, Jersey Chemicals Chlorinating Solution at a rate to maintain an available chlorine residual of 0.5 to 1.0 ppm. One-half pint (8 fl. oz.) of Jersey Chemicals Chlorinating Solution for each 3200 gallons of water will provide 1.0 ppm available chlorine by weight. Frequency of additions to maintain 0.5 to 1.0 ppm available chlorine will depend on bather load and number of swimmers. Use test kit to make certain the pH and chlorine residual are in the proper range.

NOTE: This product may lose its strength with age. Use a chlorine test kit and increase dosage, as necessary, to obtain the proper level of available chlorine.

STORAGE AND DISPOSAL: Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Flush promptly with water. Do not mix with other chemicals. Do not use in swimming pools or other areas where it may be harmful. Do not use in areas where it may be harmful. Do not use in areas where it may be harmful. Do not use in areas where it may be harmful.

DIRECTIONS FOR USE GENERAL CLASSIFICATION

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DIRECTIONS FOR SWIMMING POOL CHLORINATION

For a new pool or for spring start-up, superchlorinate with one (1) pint (16 flu. ozs.) of Jersey Chemicals chlorinating solution for each 3300 gallons of water. This dosage is equivalent to 5 ppm available chlorine by weight.

FOR POOL MAINTENANCE:

A) Adjust pool water pH to 7.6 - 7.2 range and maintain.
B) Add manually or by a feeder device. Jersey Chemicals chlorinating solution at a rate to maintain an available chlorine residual of 0.6 to 1.0 ppm. One-half pint (8 flu. ozs.) of Jersey Chemicals chlorinating solution for each 8000 gallons of water will provide 1.0 ppm available chlorine by weight. Frequency of additions to maintain 0.6 to 1.0 ppm available chlorine will depend on temperature and number of swimmers. Use test kit to make certain the pH and chlorine residual are in the proper range.

NOTE: This product degrades with age. Use a chlorine test kit and increase dosage, as necessary, to obtain the required level of available chlorine.

STORAGE AND DISPOSAL: Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and either return to manufacturer or discard by placing in trash collection or burying in an approved land fill. Product or residue that cannot be used, should be diluted with water and disposed of in a sanitary sewer. Do not contaminate food or feed by storage, disposal or cleaning or equipment.
