ENVIRONMENTAL HAZARDS (Aquatic and Nonaquatic Uses)
This pesticide is toxic to aquatic invertebrates. **FOR TERRESTRIAL USES**, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposal of wastes or washwater. Do not use treated water for animal consumption, spraying or irrigation within 14 days after treatment. **FOR AQUATIC USES**, do not apply directly to water except as specified on this label. Treatment of dense weed areas can result in oxygen loss from decomposition of dead weeds. This loss can cause fish suffocation. Therefore, treat only 1/3 to 1/2 of the dense weed areas at a time and wait 14 days between treatments. Consult your State Fish and Game agencies before applying this product to public waters. Local conditions may affect the use of this product. Consult Agricultural Extension Service for specific recommendations on dosage and time of application and for control of other weeds. Check with state and local authorities for necessary application permits.

STORAGE AND DISPOSAL

Do Not Contaminate Water, Food, or Feed By Storage or Disposal.
Pesticide Storage: Store in a dry place no lower in temperature than 50°F or higher than 120°F.

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal: Nonrefillable container. Do not reuse or refill container. Offer for recycling, if available. Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat procedure two more times.

Container Disposal For Greater than 5 gallons
Container Disposal: Nonrefillable container. Do not reuse or refill container. Offer for recycling, if available. Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its label. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

ENTRY RESTRICTIONS

For 4 days following applications to non-crop areas (other than aquatic or residential sites), do not allow employees to have contact with the treated plants, except for contact with their footwear. For spot-treatment applications to residential sites, do not allow people or pets to touch treated plants until the sprays have dried.

AQUATIC WEEDS: For application to ponds, lakes, and drainage ditches where there is little or no outflow of water and which are totally under the control of the products user. Do not use treated water for animal consumption, spraying, irrigation or domestic purposes for 14 days after treatment.

For control of submerged weeds, dilute and inject below the water surface, or pour directly into the water while moving slowly over the area in a boat. Apply early in the season before weed growth has reached the surface. Do not apply to muddy water, and do not agitate the water excessively with outboard motor or injection equipment during application. Wash sprayer immediately after application with detergent and water then rinse with clear water.

For control of cattail, duckweed, waterlettuce and floating weeds, use 20 to 48 gallons per acre diluted with 30 to 150 gallons of water. For best results, use a non-ionic surfactant in the spray mixture. Apply as a foliar treatment before flowering of weeds or as a late season treatment. Apply to thoroughly wet weeds. Repeat application as needed.
