BAYGON is a Reg. TM of the
German trademark proprietor,

CAUTION

**KEEP OUT OF REACH OF CHILDREN
CONTENTS UNDER PRESSURE**

See rear panel for caution statements.

NET WEIGHT 15 Oz.

EPA Reg. No. 10088-38-AA

EPA Est. No. 10088-WI-1

FOR MUNICIPAL INDUSTRIAL AND
INSTITUTIONAL USE

Use Wasp and Hornet Jet Spray to control bees, wasps and hornets, and to destroy their nests which are found near windows, doorways, play areas and otherwise create a hazardous condition.

DIRECTIONS

BEES, WASPS AND HORNETS: Individual insects will be killed by direct spray; however, for best results, spray nests in the late evening when insects are less active and most of them are in the nests. Spray nests, concentrating a steady stream on the opening. Spray screens, window frames and other resting areas.

SPIDERS: Use around porches, under eaves, along foundations and other outdoor areas, spraying directly on spiders, and treat webs and tracking areas. Before using on any easily stained surface, test a small spot before giving full treatment. Repeat treatment as necessary.

RESTRICTIONS

For outdoor use only. Spray may cause injury to flowers and ornamentals.

CAUTION

May be harmful if swallowed, inhaled or absorbed through the skin. Avoid breathing of spray mist. Contact with skin, eyes or clothing should also be avoided. Wash thoroughly after using. Should illness occur, get prompt medical aid.

To Physician - Atrophine sulfate is antidotal.

WARNING

Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130°F may cause bursting. Never throw container into fire or incinerator.
