

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING:

Causes eye damage and skin irritation. Harmful if swallowed. Do not get in eyes, on skin or clothing. Avoid contamination of food. Wear goggles or face shield and rubber gloves when handling. Wash thoroughly after handling.

STATEMENT OF PRACTICAL TREATMENT

IF IN EYES: Flush eyes and under eyelids with plenty of water for at least 15 minutes. Obtain immediate medical attention.

IF ON SKIN: Remove contaminated clothing and launder before re-use. Flush skin with plenty of water for at least 15 minutes.

IF SWALLOWED: Call physician or poison control center immediately. If patient is conscious, induce vomiting by stroking or tickling the patient's throat or far back on tongue. Emetics such as 2 teaspoons (10 ml) of ipecac syrup or 1 teaspoon (5 ml) dry mustard in warm water to form a paste or even soap in warm water can be used. Repeat until vomit fluid is clear. Then have patient drink plenty of milk, gelatin solution, beaten egg whites, flour and water, or other non-oily demulcent. Never induce vomiting or give anything by mouth to an unconscious person. **NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate gastric lavage.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE:

GENERAL CLASSIFICATION:

It is a violation of Federal law to use this product in a manner inconsistent with its label.

SPECIMEN LABEL

This product is used in industrial and/or commercial recirculating cooling tower systems and industrial airwashing systems to control microbiological slime. Prior to use in cooling tower systems, systems should be cleaned to remove algae growth, microbiological slime and other deposits. Then make a initial slug addition of 12.0 to 17.9 fluid ounces per 1000 gallons of water to provide 100 to 150 ppm, based on total weight of water in the system. Repeat initial dosage until control is evident.

Make subsequent slug additions of 6.0 to 17.9 fluid ounces per 1000 gallons of water (50 to 150 ppm) every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump or recirculating cooling tower systems.

This product is used in industrial air-washing systems which maintain effective mist-eliminating components. Prior to use, remove bacterial slime and deposits. An initial slug dose of 28.1 to 35.9 fluid ounces per 1000 gallons of water is recommended. Repeat initial dose until control is evident.

Subsequent slug additions of 21.0 to 35.9 fluid ounces per 1000 gallons of water should be employed every 1 to 5 days, or as needed. The frequency of addition depends upon the relative amount of bleedoff and severity of the bacterial problem. Slug additions may be made to the sump or water collection trays of the airwash systems.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a dry place no lower in temperature than 50°F. or higher than 120°F.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
