

DILUTE WITH WATER FOR SPRAYING OR MISTING

OR FUEL OIL FOR THERMAL FOGGING

TO CONTROL ADULT MOSQUITOES, FLIES, GNATS, BITING MIDGES AND MOTHS on non-crop outdoor areas: Dilute 1 gallon of insecticide concentrate with 10 gallons of fuel oil (for thermal fogging) or water (for mist blowers and pressure sprayers). Apply this mixture as a thermal fog or aerosol space spray at the rate of 5 to 10 gallons per acre. Thermal fogging is most effective in early morning or late evening, and when winds are less than 5 miles per hour.

TO CONTROL MOSQUITO LARVAE IN INTERMITTENTLY FLOODED AREAS, stagnant water, temporary rain pools, sloughs and log ponds: Mix 2 quarts of this insecticide concentrate with 10 gallons of water or fuel oil to treat one acre. Apply with mist blower or power sprayer to thoroughly wet the surface of all areas where mosquitoes and flies breed or congregate, such as garbage dumps, refuse heaps, outdoors of buildings, low damp areas and around undergrowth near stagnant water. Make repeat applications when necessary.

FOR CONTROL OF ROACH AND ANT POPULATIONS in outdoor non-crop areas: Mix 1 gallon of this product to 5 gallons of water. Apply as a wet spray, thoroughly treating the insides of manholes and sewer lines. Also apply to garbage dumps, refuse containers and cans, and around building foundations. Repeat as necessary.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.
PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal law. If these wastes cannot be disposed by use according to label instructions, contact your State pesticide or the environmental control agency or the hazardous waste representative at the nearest EPA Regional Office for guidance.
CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill or by other procedures approved by state and local authorities.
GENERAL: Consult Federal, state and local disposal authorities for approved procedures other than those given above. Approved procedures vary considerably for different types of generators.
EQUIVALENT METHOD OF TRIPLE RINSING: Empty drums as completely as possible. Remove bungs and place drums upside down until liquid has evaporated.

ACCEPTED
- 5 1980
Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended for the pesticide registered under EPA Reg. No. 10088-77

MOSQUITO & FLY CONTROL AND LARVICIDE

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS & DOMESTIC ANIMALS
CAUTION

When used as directed, this insecticide does not cause harm to humans or domestic animals. Avoid breathing spray mist. Avoid contact with skin and clothing. Wash hands thoroughly after use. Wash with soap and water. For use on domestic animals, see label directions.

STATEMENT OF PRACTICAL TREATMENT
This insecticide is effective against mosquitoes, flies, gnats, biting midges and moths. It is also effective against roaches and ants. It is used for the control of mosquito larvae in stagnant water.

ENVIRONMENTAL HAZARDS
This insecticide is highly toxic to fish and aquatic invertebrates. It is also toxic to birds and mammals. Do not apply to water bodies. Do not apply to areas where water is used for drinking or irrigation.

CHEMICAL AND PHYSICAL HAZARDS
This insecticide is a flammable liquid. It is also a skin irritant. It is toxic to aquatic life. It is also toxic to birds and mammals. Do not use in enclosed spaces. Do not use near open flames.

DIRECTIONS FOR USE
For use on mosquitoes, flies, gnats, biting midges and moths. For use on roaches and ants. For use on mosquito larvae in stagnant water. See label for detailed directions.
