US ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (75.767) WASHINGTON, DC 20460	EPA REGISTRATION NO. 10088-82	DATE OF ISSUANCE 8/26/87
NOTICE OF PESTICIDE: ☒ REGISTRATION ☒ REREGISTRATION (Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)	TERM OF ISSUANCE	
NAME OF PESTICIDE PRODUCT Brom 7.5 Herbicide Concentrate		
NAME AND ADDRESS OF REGISTRANT (Include ZIP code) Athes Laboratories P.O. Box 23926 Milwaukee, WI 53223		
NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.		
On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.		
A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.		
Registration is in no way to be construed as an endorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.		
This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:		
1. Submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.		
2. Make the labeling changes listed below before you release the product for shipment:		
a. Add the phrase "EPA Registration No. 10088-82." b. There are two Statements of Practical Treatment for dermal exposure on the front panel. Remove the first dermal treatment statement, "If On Skin: Wash skin with soap and water." c. Remove the Directions for Use heading and the accompanying misuse statement "It is a violation of federal law" from under the Precautionary Statement heading and place at the beginning of the use directions. d. Delete the words "General Classification."

- e. Under "Environmental Hazards," remove the following group of statements and place under the "Directions for Use":

Do not apply, drain, or flush equipment . . .
(to) Prevent spray drift to desirable plants.

- f. We note that you wish to name this product "Brom 7.5 Herbicide Concentrate." However, the label name is, "Brom 7.5 Water Soluble Concentrate." Please correct this discrepancy.

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Harmful or fatal if swallowed. Causes eye irritation. May irritate skin, nose, and throat. Do not get in eyes. Avoid contact with skin and clothing. Avoid breathing vapors. Wash thoroughly with soap and water after handling and before eating or smoking.

ENVIRONMENTAL HAZARDS

Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes. Keep out of lakes, streams, or ponds. Do not apply, drain, or flush equipment on or near valuable trees or other desirable plants or on areas where their roots may extend, or where the chemical may be washed or moved into contact with their roots. Do not use on lawns, walks, driveways, tennis courts, or similar areas. Prevent spray drift to desirable plants.

DIRECTIONS FOR USE
GENERAL CLASSIFICATION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product is an effective total kill herbicide for use on non-crop areas for control of many annual and perennial weeds and grasses. The degree of control and duration of effect will vary with the amount of product applied, soil type, rainfall, and other conditions.

Apply this product just before or during the period of active growth of plants to be controlled, and when rainfall can be expected for soil activation. Because it works through the soil, results will be improved by removing dense vegetation growth before treatment. Effects are slow to appear and may not become apparent until the chemical has been carried into the root zone by moisture. Do not apply when the ground is frozen.

WEED CONTROL: To control most weeds for an extended period of time on non-cropland areas such as railroad, highway, and pipeline right-of-ways, petroleum tank farms, lumber yards, storage areas, and industrial sites.

To control annual weeds and grasses such as foxtail, ryegrass, wild oats, crabgrass, cheatgrass, ragweed, lambsquarters, puncturevine, orchardgrass and turkey mullen: Apply 4% to 8% gallons per acre diluted with sufficient water to allow for uniform application. For small areas, use 8% ounces in approximately 4 gallons of water to treat 250 square feet.

To control perennial weeds and grasses such as smooth brome, bahiagrass, bluegrass, purpletop, quackgrass, broomsedge, dog fennel, aster, goldenrod, and plantain: Apply 8% to 17% gallons per acre diluted with sufficient water to allow for uniform application.

To control hard-to-kill perennial weeds and grasses such as johnsongrass, bermudagrass, dallisgrass, nutsedge, saltgrass, bouncingbet, dogbane, and horsetail: Apply 17% to 35 gallons per acre diluted

Where limited rainfall (usually less than 4 inches) occurs during the active growing period, such as some areas of the West, this product will not provide satisfactory control of hard-to-kill, deep rooted perennial weeds such as johnsongrass.

Use the higher application rates on absorptive soils (usually those high in organic matter or carbon). For retreatment on sites where weed growth has been controlled apply 2 to 4% gallons per acre.

BRUSH CONTROL: To control undesirable woody plants on non-cropland areas such as railroad right-of-ways, storage areas, industrial sites, and drainage ditches. For drainage ditches, apply as a basal (soil) treatment only.

NOTE: For effective brush control and to prevent damage to desirable vegetation: do not apply to brush in standing water; do not use water from treated areas for irrigation; do not use in irrigation ditches nor on right-of-ways or other sites where desirable trees or shrubs are immediately adjacent to treated areas.

BROADCAST TREATMENT: Apply 6% to 14% gallons per acre to control oak, willow, sweet gum, and pine; apply 17% to 35 gallons per acre to control American elm, winged elm, hackberry, sumac, and cottonwood. Use the higher application rates on absorptive soils (those high in organic matter or carbon).

BASAL (SOIL) TREATMENT: To control the woody plants shown above and maple, poplar, red bud, and wild cherry, dilute 1 gallon in 5 gallons of water and apply at the rate of 3 to 6 fluid ounces per stem 2" to 4" in basal diameter. Wet the base of stem to run-off.

Before spraying, calibrate equipment to uniformly apply the herbicide. After mixing, agitation of the spray solution is not required. Thoroughly clean all traces of chemical from application equipment with a suitable detergent cleaner immediately after use. Do not use aluminum spray nozzles.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage, disposal, or cleaning of equipment. Open dumping is prohibited. Avoid contamination of feed and foodstuff. **STORAGE:** Store in dry area. Keep inner liner closed when not in use. Do not store near food, feed, seed, or fertilizer.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse container, then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by incineration if allowed by State and local authorities. If burned, stay out of smoke.
