10088-83

**ACCEPTED**  
SEP - 7 1988  
Under the Federal Insecticide,  
Fungicide, and Rodenticide Act,  
as amended, for the pesticide  
registered under  
EPA Reg. No. 10088-83

**PRECAUTIONARY STATEMENTS**  
**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**  
**DANGER**  
Corrosive - causes eye damage. Wear goggles or face shield and rubber gloves when handling. Causes skin irritation. Harmful if swallowed, inhaled or absorbed through skin. Avoid breathing spray mists. Do not get in eyes, on skin, or on clothing. Wash thoroughly after handling and before eating and smoking. Avoid contamination of food.  
**ENVIRONMENTAL HAZARDS**  
Do not contaminate water used for irrigation or domestic purposes. Do not contaminate water by cleaning of equipment or disposal of wastes.  
**PHYSICAL AND CHEMICAL HAZARDS**  
Do not use, pour, spill or store near heat or open flame. Store at temperatures above 32°F.

**DIRECTIONS FOR USE**  
It is a violation of Federal law to use this product in a manner inconsistent with its label.  
This non-selective herbicide is designed use around buildings, storage areas, industrial sites, fences, drainage ditch banks, recreational areas, roadways, rights-of-way, railroads, machinery, pipelines, lumberyards, fuel tanks, or similar areas. Use only in areas where complete control of all vegetation is desired.  
This product can be applied mixed with water or oil, before or after plant growth begins. Although it has considerable activity through foliar contact, much of its activity is through the roots; therefore, its effectiveness is dependent on rainfall to move it into the root zone. Very dry soil conditions and lack of sufficient rainfall may result in poor weed control. When applied to the soil, this product usually inhibits plant growth for a year or more. It should not be used on land to be cropped, or near adjacent desirable trees, shrubs, or plants, as injury may occur. Do not use for weed control in greenhouses. This product is generally noncorrosive to equipment, but may cause swelling or more rapid deterioration of hoses and fittings containing natural rubber.  
Following many years of continuous use of this product and chemically related products, biotypes of some of the weeds listed on this label have been reported which cannot be controlled by this and related herbicides. Where this is known or suspected, we recommend the use of this product in combination with other registered herbicides which are not triazines. Consult with your State Agricultural Extension Service for specific recommendations.

**PROMETON 12.5%**  
**HERBICIDE CONCENTRATE**  
**NON-SELECTIVE HERBICIDE FOR**  
**BARE GROUND WEED CONTROL ON**  
**INDUSTRIAL SITES & NON-CROP AREAS**

**ACTIVE INGREDIENTS:**  
Prometon: 2,4-bis(isopropylamino)-6-methoxy-s-triazine . . . 12.5%  
**INERT INGREDIENTS** . . . 87.5%  
**TOTAL** . . . 100.00%

EPA Est. No. 10088-WI-1

**KEEP OUT OF REACH OF CHILDREN**  
**DANGER**  
**STATEMENT OF PRACTICAL TREATMENT:**  
**IF SWALLOWED:** Call a physician or poison control center immediately. Drink promptly a large quantity of milk, egg whites, or gelatin solution; or if these are not available, drink large quantities of water. Avoid alcohol. Note to physician: Probable mucosal damage may contraindicate the use of gastric lavage. Treat for circulatory shock, respiratory depression, and convulsions if needed.  
**IF ON SKIN:** Remove contaminated clothing and launder before re-use. Wash skin immediately with plenty of soap and water.  
**IF IN EYES:** Immediately flush eyes and under eyelids with plenty of water for at least 15 minutes, and get medical attention.  
**INHALATION:** Remove person from contaminated area. See side panel for additional precautionary statements.

Milwaukee, WI 53223

**INDUSTRIAL SITES AND NONCROP AREAS:** Application may be made prior to or up to 3 months after weed emergence. Application rates vary from 10 to 60 gallons of concentrate per acre, depending on climatic conditions, soil type, weeds present, and stage of growth of the weeds. Use the higher rates on heavier soils where weed growth is heavy, and where rainfall is expected to be high. Higher rates should also be used where longer residual control is desired in regions with a long growing season. For best results, apply prior to weed emergence or when weeds are young and actively growing.

**FOR CONTROL OF ANNUAL AND SUSCEPTIBLE PERENNIAL WEEDS** such as downy brome grass, oatgrass, goosegrass, quackgrass, puncturevine, goldenrod, and plantain, apply 10 to 15 gallons diluted with 50 to 100 gallons of water per acre. For small areas, apply 2 to 3 pints per 1000 square feet in sufficient water to give thorough and uniform coverage.

**FOR HARD-TO-KILL PERENNIAL WEEDS AND GRASSES** such as johnsongrass, bindweed, and wild carrot, apply 40 to 60 gallons in 50 to 100 gallons of water per acre. For small areas, apply 8 to 11 pints per 1000 square feet in sufficient water to give thorough and uniform coverage.

**FOR FASTER TOP KILL** of existing vegetation, apply this product diluted with diesel oil, fuel oil, or weed oil. Use oils at rates of 100-200 gallons per acre. Tall, dense vegetation may require 150 gallons or more per acre for thorough coverage.

**STORAGE AND DISPOSAL**  
Do not contaminate water, food or feed by storage or disposal.  
**STORAGE:** Keep container tightly closed when not in use. If container is damaged or leaking, contain spillage. Soak up spilled material with sand or inert absorbent, and place in closed, labeled container for proper disposal.  
**CONTAINER DISPOSAL:** Do not reuse empty container. Triple rinse empty container with water, then offer for reconditioning or puncture and dispose of in a sanitary landfill or by other procedures approved by state and local authorities.  
**PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions contact your state pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance in proper disposal methods.
