

JAN 30 2003

Mr. Troy Munson
Regulatory Compliance Specialist
Athea Laboratories, Inc.
Post Office Box 240014
Milwaukee, Wisconsin 53224

Dear Mr. Munson:

SUBJECT: Update Per PR Notice 2001-1
Wasp and Hornet Killer
EPA Reg. Number: 10088-91
Your Fax Received January 23, 2003

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable subject to the comments listed below. Two copies of finished labeling must be submitted prior to releasing the product for shipment. A stamped copy of the label is enclosed for your records.

1. The "If In Eye" statement is incomplete. Refer to PR Notice 2001-1, page 8 and add the following statements:

"Remove contact lenses, if present, after the first five (5) minutes then continuing rinsing eye. Call a poison control center or doctor for treatment advice."
2. Add the EPA Establishment Number to the label.
3. We note you checked child resistant packaging (CRP) on the application form. However in previous correspondence you indicated the product was not in CRP. Please confirm. If it is in CRP then you must submit the appropriate CRP certification. Refer to PR Notice 96-2.

The storage and disposal statements for residential household use pesticides have recently been modified. Refer to PR Notice 2001-6. Changes are required to be made by October 1, 2003.

If you have any questions in regard to this letter please feel free to contact me at 703/305-6100.

Sincerely yours,

George T. LaRocca
Product Manager 13
Insecticide Branch
Registration Division 7505C

Enclosure: as stated

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand this label, find someone to explain it to you in detail.)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Read Entire Label.

For best results, spray in early morning or late evening when insect activity is minimal. Stand a safe distance from nest and not directly underneath. Remove protective cap. Hold can upright and point spray opening toward nest with wind at your back. Spray until nest is thoroughly saturated to kill the entire nest population. Residual action will kill wasps and hornets returning to the nest. Wait at least 24 hours before removing the nest.

To kill wasps, hornets and yellow jackets under eaves, screens, window frames, doors, patios, cracks, holes or crevices wherever insects are noticed, spray for about 1-2 seconds or until surfaces are moist. To prevent entrance of insects into the house, spray around points where insects enter, such as outside plumbing, faucets, etc., and cracks or crevices in foundation as well as along sills and ledges.

Do not apply to pets or contaminate feed, foodstuffs, dishes or utensils. Avoid spraying vegetation directly.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with directions.

WASP & HORNET KILLER

DIELECTRIC BREAKDOWN VOLTAGE OF 47,300 VOLTS

CAN BE USED BOTH INDOORS (ATTICS AND OTHER PLACES WHERE NESTS ARE BUILT) AND OUTDOORS ON WASP & HORNET NESTS
