

DIRECTIONS

MIXING

Add the recommended amount to about one-half the required volume of water with agitation. When well mixed, add the remainder of water and mix until uniform.

For Control of Alfalfa Weevil Larva and

~~Spring Weevil on Alfalfa and Grass~~

Spring treatment: Use 2 to 3 quarts in enough water for good coverage (about 25 gallons of water) per acre.

Apply to the first crop or stubble if half the alfalfa tips show alfalfa weevil larva feeding damage. Otherwise, treat the second and third cuttings when half to 3/4 of the tips show some injury. Do Not use within 7 days of feeding or cutting hay.

COMPATIBILITY

Do Not use with materials containing sulfur or lime. Bordeaux may reduce the activity of the product.

M&M. ALFALFA SPRAY

Contains 2 Pounds of Methoxychlor and 2 Pounds of Malathion per Gallon

FALFA

This product is toxic to fish. Keep out of any body of water. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

Do not store near or contaminate feed or food stuffs.

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

Do not reuse empty drum. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place away from water supplies.
