DIRECTIONS (CON'T)

PRODUCT INFORMATION: POTATO SEED TREATER M-Z WITH BARK is £1 agricultural Fungicide in a dust form containing Dithane®-45. IT IS USEFUL FOR TREATING Potato Seed Pieces and Potato Who'e Seed for discasses listed.

RECOMMENDATIONS

POTATO SEED TREATER IN-2 is a special fungicide dust formulation for application on whole or cut potato tubers to protect them from seed-piece decay caused by Fusatium sambucinum.

DIRECTIONS FOR USE

USE 1 LB. OF POTATO SEED TREATER M-Z per 100 lbs. of whole or cut potato seed pieces, apply the dust in a manner such that the entire surface of the seed piece becomes thoroughly covered with the fungicide dust. Plant seed as soon after treatment as possible. If planting is delayed more than 1-2 days, consult the seed piece supplier or local extension specialist for proper handling. Do not use treated seed potaloes for food or feed purposes.

This product will not control bacterial diseases.

CONDITIONS OF SALE: 1. Combelt Chemical Company (Cornbelt) warrants that this material conforms to the chemical description on the label and is reasonably if for use as directed hereon. Cornbelt neither makes, nor authorizes any agent or representative to make, any other warranty of FITNESS or of MERCHANT-ABILITY, guarantee or representation, express or implied, concerning this material.

2. Critical and unforeseeable factors beyond Cornbelt's control prevent it from eliminating all risks in connection with the use of chemicals. Such risks include, but are not limited to, damage to plants and crops to which the material is applied, lack of complete control, and damage caused by drift to other plants or crops. Such risks occur even though the product is reasonably fit for the uses stated hereon and even though label directions are followed. Buyer and user acknowledge and assume all risks and liability (except those assumed by Cornbelt under 1 above) resulting from handling, storage, and use of this material.
