

SEMI SOIL STERILANT

BO-RID 5H-7.5K

ACTIVE INGREDIENTS:

Bromacil (5-bromo-3-sec-butyl-6-methyluracil)2%

*Diuron [3-(3, 4-dichlorophenyl)-1,1-dimethylurea]3%

INERT INGREDIENTS95%

Total100%

*Dupont "Karmex" Diuron Weed Killer

GENERAL INFORMATION

BO-RID 5H-7.5K Semi-Soil Sterilant, when used at rates of 200 lbs. per acre, is an effective general herbicide for the control of most annual and perennial grasses and weeds of non-cropland areas where bare ground is desired.

BO-RID 5H-7.5K Semi-Soil Sterilant may be used at any time of year for general vegetation control, providing the chemical is moved to the root zone by rainfall or artificial means.

Best results are obtained if BO-RID 5H-7.5K Semi-Soil Sterilant can be applied pre-emergence (before growth starts). The degree of control and duration of effect will vary with the amount of chemical applied, soil type, rainfall and other conditions.

BO-RID 5H-7.5K Semi-Soil Sterilant is formulated for dry application in power and hand operated spreading equipment. Effects of applications are usually slow to appear and may not become evident until the herbicide has been carried to the root zone by moisture. Because the effectiveness of BO-RID 5H-7.5K Semi-Soil Sterilant varies with environmental conditions and species of vegetation, users should consult experiment station or extension service weed specialists for suggestions for use under local conditions.

CAUTION: KEEP OUT OF REACH OF CHILDREN. See back of bag for additional cautions.

DIRECTIONS

Use a mechanical spreader or other device which will spread the required amount of BO-RID SEMI-SOIL STERILANT evenly over the area to be treated. BO-RID SEMI-SOIL STERILANT should be applied before growth starts to take advantage of early season moisture in the soil.

GENERAL VEGETATION CONTROL: To control most annual and perennial weeds for extended periods of time on non-cropland such as UTILITY, HIGHWAY, PIPELINE and RAILROAD RIGHTS OF WAY, PETROLEUM TANK FARMS, LUMBER YARDS, STORAGE AREAS, DRAINAGE DITCHES, and INDUSTRIAL PLANT SITES, apply BO-RID SEMI-SOIL STERILANT at 200 pounds per acre. A repeat spot treatment may be required where a longer period of control is desired. Second year spot treatment is usually satisfactory following a first year thorough application.

NOTICE TO BUYER — Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

CAUTION

Human

Harmful if swallowed. Avoid contact with skin, eyes or clothing. Avoid inhaling dust from product. In case of contact, flush with water.

Environmental

Do not contaminate any body of water, ponds or streams as death or injury may occur to vegetation irrigated by such. Do not contaminate water by cleaning of equipment or disposal of wastes.

Storage and Disposal

The herbicidal properties of BO-RID SEMI-SOIL STERILANT require caution in handling, storage and transportation of this product. Do not contaminate food or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container.

Pesticide that cannot be used or chemically reprocessed should be disposed of according to procedures approved by Federal, State or local disposal authorities.

For container disposal, consult Federal, State or local disposal authorities for approved procedures.
