Apply with a low-pressure sprayer equipped with a coarse spray nozzle. Spray surfaces only until wet. Avoid excessive run-off. Apply to all insect breeding sites and harborage. Also, treat adjacent exterior surfaces where insects may crawl when taking rest of hiding. Do not spray into the air. Repeat treatment as necessary.

For use in industrial plants, warehouses, storage areas, manufacturing plants, homes, hospitals, restaurants, hotels and motels and food processing plants.

Directions for use.

Apply with a low-pressure sprayer equipped with a coarse spray nozzle. Spray surfaces only until wet. Avoid excessive run-off. Apply to all insect breeding sites and harborage. Also, treat adjacent exterior surfaces where insects may crawl when taking rest of hiding. Do not spray into the air. Repeat treatment as necessary.

Ants

Ants, wasps, crickets, silverfish, spiders and waterbugs: Spray into cracks, crevices, around baseboards and other places where these insects hide, using a coarse, wet spray. Apply behind and beneath cabinets, refrigerators, sinks, stoves, and in and around waste containers. For ants, spray trails and places where ants enter premises. Repeat as needed. Do not spray foodstuffs or other areas where pets and cover fish bowls before spraying. Do not allow children to contact treated surfaces, or spray in areas easily accessible to children.

Crickets: Spray sleeping quarters of pets with a coarse, wet spray, in and around baseboards, window and door frames, wall cracks and other areas of floor. Repeat as needed. Do not allow children to contact treated surfaces after spraying. Do not spray animals.

Cricket Beetles: Make localized applications to cracks in the floor and baseboards. Spray into cracks and crevices, especially in crevices and behind baseboards. Repeat as needed. Do not allow children to contact treated surfaces.

Flies

Flies, wasps, crickets, silverfish, spiders and waterbugs: Spray into cracks, crevices, around baseboards and other places where these insects hide, using a coarse, wet spray. Apply behind and beneath cabinets, refrigerators, sinks, stoves, and in and around waste containers. For ants, spray trails and places where ants enter premises. Repeat as needed. Do not spray foodstuffs or other areas where pets and cover fish bowls before spraying. Do not allow children to contact treated surfaces, or spray in areas easily accessible to children.

Cricket Beetles: Make localized applications to cracks in the floor and baseboards. Spray into cracks and crevices, especially in crevices and behind baseboards. Repeat as needed. Do not allow children to contact treated surfaces.

Use only in the immediate vicinity of meat packing plants and other food processing plants. All exposed food products, food materials, and packaging materials must be removed or covered before operations. Wash all equipment with water before commencing operations. Wash all food processing plants early in the season before operation. When necessary, use insecticide application. If necessary, when plant is in operation, use insecticide in cracks and crevice areas where insects congregate. Kill and prevent re-infestation. Use sanitation and good housekeeping. All wastes collected in any effective insect control program should be treated in any manner considered appropriate by the local health department.

APPENDIX

Do not swallow. Keep out of reach of children. Avoid contact with eyes and mucous membranes. Avoid prolonged breathing of the spray mist. Wash thoroughly after use. Do not use on food products or animals. This product is toxic to fish. Do not use on plants before you spray. Do not use on plants, trees, shrubs or leaves of plants. Do not use on plants, trees, shrubs or leaves of plants. Do not use on plants, trees, shrubs or leaves of plants.
