ACTIVE INGREDIENTS

100%  
0-0 diethyl 0 2 isopropyl 4 methyl  
6 pyrimidinyl phosphorothioate  
0 50% Pyrethrins 0 05%  
Aromatic Petroleum Solvent  
2 00% Aliphatic Petrol-  
eum Solvent 97 45%

USA PATENT OFFICE, 1914-1915

Manufactured by

1150 Broadway • New York, N.Y. 10036

## DIRECTIONS FOR USE

**Cockroaches (Waterbugs), Ants and Silverfish in Buildings:** This spray should be used for spot applications to infested areas. Application should be made as a coarse spray or by paint brush to baseboards, areas around water pipes, cracks and crevices, surfaces behind and beneath cabinets, refrigerators, sinks, stoves and similar areas where these insects hide. Also, spray ant trails, door frames and window sills where ants enter premises. Treatment should be repeated as necessary.

Excessive use may affect Asphalt or Rubber Tile.

ROSE INSECT SPRAY is compounded from materials found highly successful in the field operations of Rose Exterminator Co. since 1860. Direct contact with the insect is desirable, but not necessary. Good results can be expected by treating surfaces where insects are expected to walk or rest.

ROSE INSECT SPRAY may be applied with a sprayer in a coarse spray or with a paint brush. Make the surface to be treated wet to touch. Allow to dry. Do NOT wash away.

ONE QUART

8-13-68  
 UNDER THE FEDERAL INSECTICIDE ACT  
 REGISTERED FOR THE CONTROL OF  
 COCKROACHES AND SILVERFISH  
 REGISTRATION NO. 10130-3

**CAUTION**

Avoid contact with skin and eyes. Avoid contamination of food.  
 Wash hands with soap and water after spraying. **FLAMMABLE MIXTURE:** Keep  
 away from open flames. Do not spray into or onto plants with this formulation. Direct spray onto  
 surface of insects. Humidity will slow down action. Do not allow children to enter treated areas until surfaces  
 are dry.
