# NP-25L

## ACTIVE INGREDIENTS

n-Alkyl (59% C<sub>12</sub>, 30% C<sub>14</sub>, 5% C<sub>16</sub>, 5% C<sub>18</sub>) dimethyl benzyl ammonium chloride 5.0%

n-Alkyl (50% C<sub>12</sub>, 30% C<sub>14</sub>, 17% C<sub>16</sub>, 3% C<sub>18</sub>) dimethyl ethylbenzyl ammonium chloride 5.0%

## INERT INGREDIENTS

90.0%

## CAUTION: KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. ZEOLITE ALGAECIDE NP-25L is highly concentrated and should be flushed from skin and eyes with water if splashed on them. Consult physician should irritation persist. When ZEOLITE ALGAECIDE NP-25L is used as directed it will aid in controlling and/or preventing the development of unsanitary slime conditions which are unsightly, produce foul odors and which are often the cause of equipment breakdown. ZEOLITE ALGAECIDE NP-25L is compatible with virtually all corrosion inhibition additives but should not be used in the presence of soap or other anionic detergents.

ZEOLITE ALGAECIDE NP-25L is not a foodstuff and should not come in contact with food. Avoid contact with skin and eyes.

## DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**Initial Dose:** 1-2 gallons of ZEOLITE ALGAECIDE NP-25L to 5,000 gallons of water. Add treatment directly to cooling tower or to the make up water.

**Maintenance Dose:** 1-3 quarts of ZEOLITE ALGAECIDE NP-25L to 5,000 gallons of water every 7 days or sooner should visible growth appear.

For best results, rid system of organic debris if possible. If soap or anionic detergent is used, rinse thoroughly before charging with ZEOLITE ALGAECIDE NP-25L.

Do not be alarmed with the sudden appearance of a considerable amount of organic debris in the system during the first week of operation. This is normal and is a good indication that ZEOLITE ALGAECIDE NP-25L has effectively penetrated and dislodged dead organic material which tenaciously adheres to metal and wooden surfaces as living matter.

Make up water should be treated at maintenance dose levels.

## STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. Do not reuse container. Keep container closed when not in use.

### PESTICIDE DISPOSAL:

Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

### CONTAINER DISPOSAL:

**Plastic Containers:** Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

**Metal Containers:** Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture, and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

ACCEPTED

OCT 2 1991

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act,  
as amended, for the pesticide  
labeled under  
EPA Reg. No. 10133-1
