

# SEBESTA'S POCKET GOPHER BAIT

Active Ingredient		
Strychnine .....		0.31%
Inert Ingredients .....		99.69%
	Total .....	100.00%

**Net Weight 5 Lbs.**

**DANGER - CONVULSIVE POISON: KEEP AWAY**  
from children and domestic animals. Avoid contamination of foodstuffs. Poisonous if  
swallowed. Wash hands after using.

## Directions For Use

**Probe Method:** Locate runway with sharp stick by probing at a distance of 18 inches from an active pocket gopher mound. Insert a teaspoonful of bait into runway and close the hole so that it is tight and taking care to prevent covering the bait placement with dirt.

**Burrow Builders:** Space artificial burrows approximately twenty feet apart at a depth of natural burrow. Set mechanism to feed bait at the rate of approximately two pounds per acre. Burrow-building constructs the best burrow in moist soil. In dry soil the burrows will crumble and cave in.

# POISON

**ANTIDOTE: CALL A PHYSICIAN IMMEDIATELY.**

If less than ten minutes have passed since the poison was taken, give a tablespoon of salt in a glass of warm water to remove unabsorbed strychnine. Have victim lie down in a quiet, darkened room and keep him warm.

**DETAILED DIRECTIONS FOR BAIT PLACEMENT  
ARE ENCLOSED IN EACH BAG.**
