**GENERAL PURPOSE  
SANITIZER—CLEANSER**

**For Use Throughout the Plant With Foam  
For Very Heavy Grease, Fat, Blood and Protein  
Removal  
Very Thorough Cleansing and Extremely Fast  
Rinsing**

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Before using this product, all products and packaging materials must be removed from the area and are fully protected.

**FOR HEAVY DUTY CLEANING WITH FOAM** use 4 to 6 pounds of FOAM KLEEN per 50 gallons of water. Fill drum with cold water. Add FOAM KLEEN and dissolve. Fill drum with hot water. When nearly full add 1 gallon of BICLOR RITE and 1/2 gallon of LIQUID PENNY BLU or NEUTRA FOAM. Stir well then apply through a foamer after roughing down. Wait 5 minutes or so before rinsing with potable water.

FOAM KLEEN is compounded with "rinse aids" which cause the foam to break and disappear quickly during rinsing. In order these "rinse aids" must be over powered with foam generators to make a good thick foam. The combination leaves the walls and equipment spotless.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage and disposal. Open dumping is prohibited. Do not reuse empty container. Pesticide Disposal—Pesticide, spray mixture, or residue that cannot be used or chemically reprocessed must be disposed of according to appropriate Federal, state, or local procedures under the Resource Conservation and Recovery Act. Container Disposal—Completely empty container by shaking and tapping sides and bottom to loosen and dislodge all residue into application equipment. Then dispose of container as a solid waste by incineration if allowed by state and local authorities. Drum cannot be reused. Dispose of in the same manner as above. Keep containers closed when not in use.
