UNI-ROOTER

KILLS ROOTS IN SEWERS

ACCEPTED

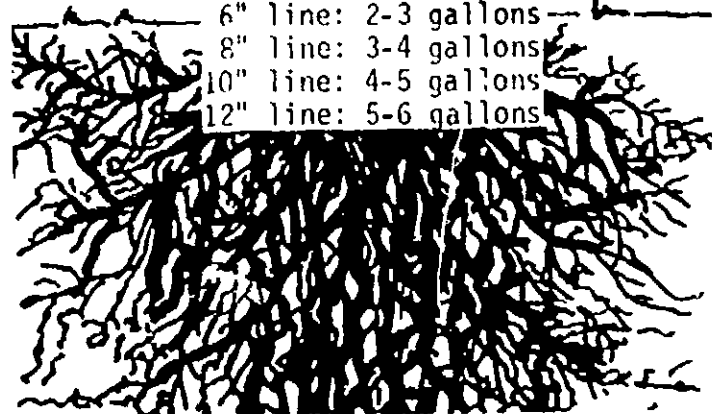

JUL 17 1980

Federal Insecticide
and Fungicide Act
Approved for sale
in the United States
EPA Reg. No. 10155-22

RECOMMENDED DOSAGES:

- 4" line: 1-2 gallons
- 6" line: 2-3 gallons
- 8" line: 3-4 gallons
- 10" line: 4-5 gallons
- 12" line: 5-6 gallons

AGITATE BEFORE USING

ACTIVE INGREDIENT:
Copper sulfate (anhydrous).....6.3%
INERT INGREDIENTS:.....93.7%
100.0%

**KEEP OUT OF REACH OF CHILDREN
CAUTION**
See Side Panel for Additional Precautions

EPA Reg. No. 10155-22 EPA Est. 10155-H-1

Application Instructions

UNI-ROOTER provides an effective and thorough method of destroying roots and obnoxious decay odors. UNI-ROOTER offers fibrous root control and further acts as a prophylactic to retard root growth after initial applications or the use of a sewer rodder.

DIRECTIONS: Sewer inspections will reveal sections becoming clogged due to roots. When evidence is noted, it's time to use UNI-ROOTER. Choose a time of low flow and apply recommended rate of UNI-ROOTER to the man-hole above the clogged area. UNI-ROOTER is completely soluble and forms an instant solution. Water pressure from a hose or a sewer jet will create a high sudsing solution which will coat the interior walls of the sewer. This assures better and longer lasting contact between the roots and UNI-ROOTER. UNI-ROOTER is purposely designed for contact control and will not systemically translocate in the hardwood and kill the tree or shrub.

Notice

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
