

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.
STORAGE: Store at warm temperatures, but not above 115°F. Some crystallization may occur at 95°F, but product normally super-cools to remain liquid at much lower temperatures.
 Use warm water (110°-140°F) on exterior of vented drum(s) to melt any crystallized material. Do not contaminate BETASAN with water. **DO NOT USE STEAM.** Use jacketed or insulated equipment for bulk transfer and storage to prevent crystallization.
PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.
SPILL OR LEAK: Make sure all personnel involved in spill are aware of the hazards associated with this material.
 A small spill can be handled routinely considering the physical and hazardous properties of the product as well as the location of the spill. Use adequate ventilation and wear an air supplied respirator to prevent inhalation contact. Wear protective clothing to prevent skin and eye contact. Soak up pooled liquid as follows:
 1. If BETASAN is in the liquid state: Spread a suitable absorbent such as clay on the liquid.
 If BETASAN is in the solid state: Sweep up the powder being careful not to create dust.
 2. Place sweepings in an open drum.
 3. Generously cover the contaminated area with a common household detergent. Using a stiff brush, work the detergent into the spill material adding sufficient water to form a slurry. Brush the slurry into cracks and crevices and allow to stand for 2 to 3 minutes. Be careful to completely avoid skin or eye contact; do not splatter on one's self or bystanders.
 4. Spread absorbents on the slurry liquid, and shovel the absorbed material into an open drum.
 5. Repeat if necessary.
 6. Flush area with water, while observing proper environmental considerations.
 7. Seal drum and dispose of contaminated material in an approved pesticide dump.
 Large spills must be handled according to a predetermined plan. For assistance in developing a plan, contact Gowan Company.

FOR 24-HOUR CHEMICAL EMERGENCY: SPILL, LEAK, FIRE, EXPOSURE, OR ACCIDENT CALL CHEMTREC (800) 424-9300.

For other product information, contact Gowan Company or see Material Safety Data Sheet.

NOTICE ON CONDITIONS OF SALE

Our recommendations for use of this product are based upon tests believed to be reliable. The use of this product being beyond the control of the manufacturer, no guarantee, expressed or implied, is made as to the effects of such or the results to be obtained if not used in accordance with directions or established safe practice. The buyer must assume all responsibility, including injury or damage, resulting from its misuse as such, or in combination with other materials.
 This product is sold only for uses stated on its label. No express or implied license is granted to use or sell this product under any patent in any country except as specified: Country: United States of America.
 BETASAN® is a trademark of ZENECA Group Company.
 Made in U.S.A.
