**REGION B⁴
APPLICATION RATE TABLE**

FUSILADE 2000 + Cygon 400	
Product	Rate ^{5,6}
FUSILADE 2000	16-48 fl. oz. (0.125-0.375 lb. ai/A)
Cygon 400	1/4-1 pint/A (125-500 lb. ai/A)

⁴ For the areas of Arizona, California, New Mexico, West Texas and West Oklahoma as outlined in the FUSILADE 2000 label.

⁵ Recommended rate and stage for grass weeds to be treated as per FUSILADE 2000 label.

⁶ At the recommended rate for the target insect pest as per the Cygon 400 label.

Timing ~ Apply to actively growing grasses before they exceed the recommended growth stages shown on the FUSILADE 2000 label. Apply as required for insect control based on scouting reports. Subsequent applications of Cygon 400 may be required as indicated by scouting reports. New growth or regrowth of grasses may be treated when size reaches recommended growth stages shown on label.

Do not apply if rainfall is expected within 1 hour.

Spray Additives (Cleared for use on growing crops)

Always add one of the following:

- **Crop oil concentrate** ~ Add a nonphytotoxic crop oil or a once-refined vegetable oil concentrate containing 15-20% approved emulsifier, at 1% (1 qt. per 25 gallons) of the finished spray volume. When using lower spray volumes, a minimum of 1 pint of crop oil concentrate should be used per acre.
- **Nonionic surfactant** ~ Add nonionic surfactant containing at least 75% surface active agent, at 0.25% (1/2 pint per 25 gallons) of the finished spray volume. However, the rate of surfactant should be a minimum of 6 fluid ounces per acre.

Ground Application ~ Use 5-40 gallons of total spray mixture per acre and 40-60 psi pressure. Sufficient spray volume and pressure should be provided to provide complete coverage of the foliage.

Use higher volumes and increase the pressure to 60 psi if foliage is dense to ensure complete coverage.

Band Applications ~ Band application equipment should be adjusted to provide maximum coverage of foliage in the planted row. Thorough coverage can be obtained with a nozzle directed to each side of the row towards the foliage in the planted row. Applications with a single nozzle over the top of the row are not recommended.

Do not use band applications when the grass is 3 perennial. Infestation of the treated band can result from the untreated band.

Aerial Application ~ Use a minimum of 5 gallons of finished spray volume per acre. If the foliage is dense, increase the spray volume to 10 gallons per acre to improve coverage.

Mixing ~ Fill the spray tank half-full with water and add the recommended amounts of FUSILADE 2000 + Cygon 400 while the agitator is running. Then add crop oil concentrate or nonionic surfactant and the remaining quantity of water and mix thoroughly.

USE RESTRICTIONS

- Always read and follow the restrictions and limitations for all products whether used alone or in tank-mix. The most restrictive labeling of any product used applies in tank-mixtures.
- A maximum of 96 fl. oz. of FUSILADE 2000 may be applied per season to cotton.
- Cotton may not be harvested within 90 days of a tank-mix application containing FUSILADE 2000.
- Do not graze or harvest for forage or hay.
- Do not apply FUSILADE 2000 after boll set.

- Do not plant rotational grass crops such as corn, sorghum and cereals within 60 days after the last application of FUSILADE 2000.
- Avoid drift to all other crops and nontarget areas.
- Clean sprayer with water and a commercial sprayer cleaner or surfactant/adjuvant as per the recommended use directions of the respective products.
- Apply to foliage when grasses are actively growing.
- If automatic flagging is not possible, human flagger must wear protective clothing and respirator specified on Cygon 400 label.
- Repeat application of Cygon 400 should not be made at intervals closer than 14 days.
- Only two applications of Cygon 400 at the higher rate may be made per season.

DIRECTIONS FOR USE

NONFOOD USES

Not for use or storage in or around the home.

FALLOW LAND

FUSILADE 2000 herbicide can be used to control grass weeds during fallow periods.

Do not plant rotational grass crops such as corn, sorghum and cereals within 60 days after the last application of FUSILADE 2000.

NONBEARING CROPS

COPY A

FUSILADE 2000 herbicide can be used to control grass weeds in nonbearing groves, orchards or vineyards or for site preparation prior to transplanting.

APPLY AS A DIRECTED SPRAY TO PREVENT CONTACT OF SPRAY WITH FOLIAGE OF TREES OR VINES.

DO NOT APPLY TO TREES, VINES OR OTHER LISTED CROPS THAT WILL BE HARVESTED WITHIN ONE YEAR AFTER APPLICATION.

DO NOT APPLY TO ASPARAGUS FROM WHICH SPEARS WILL BE HARVESTED WITHIN ONE YEAR OF TREATMENT.

FUSILADE 2000 herbicide is recommended on the following nonbearing crops:

Acerola	Lemons
(West Indian Cherry)*	Limes
Almonds	Macadamia
Apples	Mango*
Apricots	Nectarines
Asparagus	Olives
Avocados	Oranges
Bananas	Peaches
Cherries	Pears
Coffee	Pecans
Dates ← <i>COPY B</i>	Pistachios
Figs	Plums
Filberts	Pomegranates
Ginseng*	Prunes
Grapes	Tangelos
Grapefruit	Tangerines
Guava*	Walnuts
Jojoba	Kiwi*

*Not applicable in California

ORNAMENTALS

FUSILADE 2000 herbicide can be used to control grass weeds in many newly transplanted and established non-grassy ornamentals, trees, shrubs and ground covers. See the following Tables I through IV for specific recommended uses.

Application of FUSILADE 2000 may be made over-the-top to ornamentals listed in Table I. Plants listed in Tables II through IV should have a directed spray applied to prevent contact of spray with foliage. If the growth habit of the plant or other factors do not allow a directed spray, an over-the-top application can be made to plants in Table II-IV. However, there is th

possibility of damage in the range listed for each table when applied at label rates

DO NOT APPLY TO ORNAMENTALS THAT MAY BE HARVESTED FOR FOOD WITHIN ONE YEAR AFTER APPLICATION.

NOTICE TO BUYER AND USER: It is impossible to test every species and variety or cultivar of ornamental or nursery plants under all conditions. Plant tolerance of pesticides vary as conditions vary. Plant tolerance of FUSILADE 2000 at label rates has been found to be acceptable within the ranges specified for the indicated genera and species. Neither the manufacturer nor the seller has determined whether or not FUSILADE 2000 can safely be used on plants not specified on this label. The professional user should determine if FUSILADE 2000 can be used safely prior to use.

APPLICATION DIRECTIONS - NON-FOOD USES

Timing - For non-food use apply to actively growing grass weeds before they exceed the recommended growth stages shown on this page

Do not apply FUSILADE 2000 herbicide if rainfall is expected within 1 hour.

Spray Additives (Cleared for use on growing crops)

ALWAYS ADD ONE OF THE FOLLOWING:

- **Crop Oil Concentrate** - Add a nonphytotoxic crop oil or a once refined vegetable oil concentrate containing 15-20% emulsifier, at 1% (1 quart per 25 gallons) of the finished spray volume.
- **Nonionic Surfactant** - Add nonionic surfactant containing at least 75% surface wetting agent, at 0.25% (½ pint per 25 gallons) of finished spray volume. Use only nonionic surfactant on ornamentals.

DIRECTIONS FOR USE

ANNUAL AND PERENNIAL GRASS CONTROL RECOMMENDATIONS FOR NON-FOOD USES

- Use 32-48 oz. of FUSILADE 2000 herbicide per acre and 1% crop oil concentrate (1 quart per 25 gallons) or 0.25% (½ pint per 25 gallons) of a nonionic surfactant. Use only nonionic surfactant on ornamentals.
- Spray to obtain thorough coverage of grass foliage, but not to runoff. Repeat treatments may be necessary to provide full season control.
- Use standard pesticide hollow cone or flat fan nozzles.
- Apply FUSILADE 2000 herbicide to actively growing grasses before they exceed the recommended growth stages shown below.
- Do not apply FUSILADE 2000 herbicide to grasses which are stressed due to moisture, temperature, low soil fertility, mechanical or chemical injury.
- Do not apply to grasses which have tillered, formed seed heads, or exceeded recommended growth stages.
- Apply FUSILADE 2000 herbicide when the first grass species in a mixed grass weed population reaches the recommended growth stage for treatment.
- Do not use a crop oil concentrate with FUSILADE 2000 on ornamentals.
