GENERAL INFORMATION

BONZI is a plant growth regulator for greenhouse use on container-grown poinsettias and geraniums. Use of BONZI effectively reduces internode elongation, resulting in more desirable compact plants. When used as directed, BONZI produces no phytotoxic effects. Desired height control is usually obtained with a single BONZI foliar spray application.

APPLICATION

Dilute BONZI with water according to the table below. The spray solution must be uniformly distributed within the treatment area. Treat poinsettias beginning 1 to 4 weeks following pinch. Treat geraniums as needed for desired height control. After application, watering should be directed below treated foliage for the balance of the crop-finishing time.
