FUSILADE® 2000 Herbicide

EPA Reg. No. 10182-104

DIRECTIONS FOR USE

Tabasco Pepper (Capsicum frutescens cv. tabasco in Louisiana only) — for the control of annual and perennial grasses. Apply a postemergence spray with ground application at the rate of 0.375 lb. a.i./acre in a single or split application. Do not apply more than 0.75 lb. a.i. per acre total per season. Do not harvest within 45 days of last application.

COTTON, SOYBEANS, AND CARROTS
REENTRY STATEMENTS

Do not treat areas while unprotected humans or domestic animals are present in the treatment areas. Do not allow entry into treated areas without protective clothing until sprays have dried. Because certain states may require more restrictive reentry intervals for various crops treated with this product, consult your State Department of Agriculture for further information.

Written or oral warnings must be given to workers who are expected to be in a treated area or in an area about to be treated with this product. When oral warnings are given, warnings shall be given in a language customarily understood by workers. Oral warnings must be given if there is reason to believe that written warnings cannot be understood by workers.Warnings must include the following information: "CAUTION: Area treated with FUSILADE® 2000 on (date of application). Do not enter without appropriate protective clothing until sprays have dried. In case of accidental exposure to pesticide spray, wash the skin thoroughly with soap and water. Remove contaminated clothing and wash before reuse. Get medical attention. If in eyes, flush with plenty of water. Get medical attention if needed."
STORAGE AND DISPOSAL

PROHIBITIONS: Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container.

STORAGE: Store in original container only. Keep container closed when not in use. Do not store near food or feed. In case of spill or leak on floor or paved surfaces, soak up with sand, earth or synthetic absorbent. Remove to chemical waste area.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture or unfilled is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL:

Metal Containers: Triple-rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill or by other procedures approved by state and local authorities.

Plastic Containers: Triple-rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Glass Containers: Triple-rinse (or equivalent). Then dispose of in a sanitary landfill, or by other approved state and local procedures.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This labeling must be in the possession of the user at the time of application.

GENERAL INFORMATION

FUSILADE® 2000 Herbicide is a selective post-emergence herbicide for control of annual and perennial grass weeds. FUSILADE 2000 will provide effective control of grass weeds in conventional tillage, minimum tillage, and no-till plantings. FUSILADE 2000 does not control broadleaf weeds or sedges (bulrush).

Control Symptoms - FUSILADE 2000 is a systemic herbicide which moves from the treated foliage into the shoots, roots, rhizomes, stolons, and growing points (meristematic regions) of treated grass weeds. Excellent control of a wide range of annual and perennial grass weeds will be obtained with FUSILADE 2000 when applied as recommended on this label.

Growth of treated grass weeds stops soon after application. Symptoms include loss of vigor, yellowing and/or reddening, and eventual death to the treated grass plant. Symptoms are generally observed within one to three weeks, depending on grass weed species and environmental conditions.
APPLICATION DIRECTIONS

Timing - Apply to actively growing grass weeds before they exceed the recommended growth stages shown on this label.

Do not apply FUSILADE 2000 if rainfall is expected within 1 hour.

Spray Additives (Observe use on growing crops)

**ALWAYS ADD ONE OF THE FOLLOWING:**

- Crop Oil Concentrate - Add a non-phytotoxic crop oil concentrate or a refined vegetable oil concentrate containing 15-20% approved emulsifiers, at 1% (1 quart per 25 gallons) of the finished spray volume. For aural applications, add one pint of crop oil concentrate per acre.

- Nonionic Surfactant - Add nonionic surfactant containing at least 75% active ingredient, at 0.25% (6 pint per 25 gallons) of the finished spray volume for ground sprays. For aerial application, add 1 pint of surfactant per acre.

Ground Application - Use sufficient spray volume and pressure to ensure complete coverage. Use 5-40 gallons of spray volume per acre and 40-60 psi pressure. A sufficient spray volume and pressure should be used to provide complete coverage of the treated grass weed species. Use higher volumes and pressure if the grass foliage is dense to ensure complete coverage.

DO NOT USE FLOOD TYPE OR OTHER SPRAY NOZZLE TIPS WHICH DELIVER COARSE, LARGE DROPLET SPRAYS.

DO NOT APPLY FUSILADE 2000 WITH RE-CIRCULATING SPRAYERSP, ROPE-WICK APPLICATORS, CONTROLLED DROPLET APPLICATORS (CDA9) OR ANY SIMILAR DEVICES.

**BAND APPLICATIONS** - Thorough weed coverage is important for control. Best coverage is obtained with a minimum of two nozzles, one directed to each side of the planted row. A single nozzle directed over the top of the row during application may not provide adequate coverage and is not recommended.

Apply the broadcast equivalent rate and volume per acre. Calculate these by the following formula:

\[
\text{Band width in inches} \times \text{broadcast rate} = \text{Band herbicide rate per acre per acre}
\]

\[
\text{Band width in inches} \times \text{broadcast volume} = \text{Band water volume per acre per acre}
\]

The use of band applications on perennial grasses may result in reinestation of the treated band from the untreated middle and is not recommended.
SPOT SPRAY RECOMMENDATIONS

**Add These Amounts**

<table>
<thead>
<tr>
<th>Volume</th>
<th>Oil Concentrate</th>
<th>Surfactant</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 gallon</td>
<td>1/4 ft oz</td>
<td>1 pt</td>
</tr>
<tr>
<td>10 gallons</td>
<td>13 ft oz</td>
<td>3 l sq</td>

<tr>
<td>25 gallons</td>
<td>32 ft oz</td>
<td>1 quart</td>
</tr>
<tr>
<td>50 gallons</td>
<td>64 ft oz</td>
<td>2 quarts</td>
</tr>
</tbody>
</table>

Do not use a crop oil concentrate on ornamentals. Use only nonionic surfactants on ornamentals.

**DIRECTIONS FOR USE**

**ANNUAL AND PERENNIAL GRASS WEED CONTROL FOR COTTON AND SOYBEANS**

**REGION A**

- Annual Grass Control
  - Rates for annual grass control in Region A are 12-32 oz of FUSILADE 2000 per acre.
  - Re-treat at the recommended rate if needed to control late-germinating grasses.

**REGION B**

- Annual Grass Control
  - Rates for annual grass control in Region B are 16-48 oz of FUSILADE 2000 per acre.
  - In cotton, re-treat at the recommended rate if needed to control late-germinating grasses or re-growth.
  - In soybeans, do not apply more than 64 oz of FUSILADE 2000 per acre per season.

<tr>
<td>In cotton re-treat at recommended rate and runner length (usually occurs about 4 weeks after first application). In soybeans, do not apply more than 64 oz. in one season. Bermudagrass is a low-growing perennial, and the crop canopy may shield it from herbicide sprays. Improvement in coverage may be achieved by directing the spray under the crop canopy. A minimum spray volume of 20 gallons/acre is suggested to improve coverage.</td>

### Labeled Crops Remarks and Precautions

**COTTON** — Do not apply a total of more than 96 oz of FUSILADE 2000 herbicide per acre per season to cotton.

- Do not harvest cotton within 90 days of application.
- Do not apply after blossom.
- Do not graze or harvest for forage or hay.
- Do not plant rotational grass crops such as corn, sorghum and cereals within 60 days after last application.

**SOYBEANS** — Do not apply a total of more than 64 oz. of FUSILADE 2000 herbicide per acre per season to soybeans.

- Make last application before bloom.
- Do not graze or harvest for forage or hay.
- Do not plant rotational grass crops such as corn, sorghum and cereals within 60 days after last application.

**SOYBEAN TANK-MIX**

FUSILADE® 2000 HERBICIDE/BASAGRAN® HERBICIDE

Postemergence Control of Grass and Broadleaf Weeds

FUSILADE 2000 herbicide and Basagran herbicide may be used together in a post-emergence program for broad-spectrum weed control in soybeans.

FUSILADE 2000 is a selective postemergence herbicide for control of annual and perennial grass weeds in soybeans. Basagran is a selective postemergence herbicide for the control of certain broadleaf weeds. FUSILADE 2000 herbicide and Basagran herbicide may be applied sequentially or in tank-mix. The growth stage of weeds at the time of application will determine which method of application will provide the most satisfactory results. Both FUSILADE 2000 and Basagran herbicide should be applied to actively growing weeds. See Basagran herbicide label for defined environmental conditions that promote active growth. Do not apply either herbicide if weeds

### CARROTS

- Do not apply a total of more than 96 oz. of FUSILADE 2000 1E herbicide per acre per crop to carrots.
- Do not harvest carrots within 45 days of application.
- Do not plant rotational grass crops such as corn, sorghum, and cereals within 60 days after last application.
