ARROSOLO 3-3E

Dear Registrant:

The labeling cited above and submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable subject to the comments listed below.

Based on your certification, the Agency has accepted only those changes to your labeling which are necessary to comply with PR Notices 93-7 and 93-11, which reflect the WPS labeling requirements of 40 CFR part 156, subpart K. Any other labeling changes submitted in connection with this amendment application and not directly related to compliance with PR Notice 93-7 or 93-11 have neither been reviewed nor accepted by the Agency. If you wish to make any such changes, you must submit a separate amendment application proposing them. If your product registration is currently suspended, acceptance of this labeling amendment does not affect the suspension in any way.

A copy of your proposed labeling stamped "Accepted with comments" is attached. Make any required changes described in the attached and send three copies of final labeling as soon as it is available to:

Document Processing Desk (FIN-LABEL)  
Office of Pesticide Programs (H-7504C)

✓ **AGRICULTURAL USE REQUIREMENTS**

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protection equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

✓ Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours:

- Shoes plus socks
- Protective eyewear

**GENERAL USE PRECAUTIONS**

Read all label directions before using. Do not overdose.

ARROSOLO® 3-3E emulsifiable liquid herbicide should be used only for recommended purposes and at recommended rates. ARROSOLO 3-3E may cause crop injury under extreme soil or climatic conditions or if directions are not followed.

Except as specified on this label, the use of fertilizers, oils, surfactants and/or herbicides in tankmixes with ARROSOLO 3-3E may result in crop injury and/or impair the mixing properties of ARROSOLO 3-3E. A small scale physical compatibility test, as outlined in Appendix I, should be conducted on all herbicide tankmixes before combining in the spray tank.

Avoid spray drift to all other crops and non-target areas.

Do not apply carbamate or organophosphorus insecticides in combination with ARROSOLO 3-3E.

Do not apply carbamate or organophosphorus insecticides within 7 days before or after ARROSOLO 3-3E application. Severe injury or kill of rice plants may result from tankmix combination or separate sprays of ARROSOLO 3-3E and certain insecticides.

Do not apply ARROSOLO 3-3E when rice is exhibiting stress from very cold temperatures, drought conditions, or injury from previously applied pesticides, diseases or insects.

ARROSOLO 3-3E should only be applied to fields which have been drained of flood water to expose susceptible weeds.

To avoid injury do not apply when the air temperature is above 100°F.

Weed control may be impaired if ARROSOLO 3-3E is applied when the air temperature is below 70°F.

For best results apply ARROSOLO 3-3E to actively growing weeds in the 1-2 leaf stage.

Do not apply if rainfall is anticipated within 6 hours after application.

Apply only when wind velocity is low, 0-5 mph.

Do not apply more than 9 pounds of active ingredient of ORDRAM® selective herbicide per acre per season.

**GENERAL APPLICATION DIRECTIONS**

ARROSOLO 3-3E is a selective broad spectrum postemergence rice herbicide for control of annual grasses and broadleaf weeds.

All equipment used in the application of ARROSOLO 3-3E should be carefully calibrated before use and checked frequently during application to be sure the application is uniform. Avoid overlaps that will increase ARROSOLO 3-3E dosage above recommended limits, because crop injury may occur.

Apply ARROSOLO 3-3E in 20 to 50 gallons of water per acre by ground equipment and in 10 to 15 gallons of water per acre by airplane.

Shake well before using.

**DIRECTIONS FOR USE AND RECOMMENDATIONS**

**SOUTHERN UNITED STATES (Arkansas, Louisiana, Mississippi, Missouri [Boot-Heel Region Only] and Texas)**

**POSTEMERGENCE, PREFLOOD:** For use on dry-seeded and water-seeded rice. For control of Barnyardgrass, Sprangletop, Dayflower and Broadleaf Signalgrass, apply ARROSOLO 3-3E at 3 to 4 quarts per acre depending on weed size as shown in the table

below. For best results, apply ARROSOLO 3-3E when weeds are in the 1-2 leaf stage. Flood the rice within 5 days after application to prevent weed reinfestation.

**APPENDIX I****Procedure for Testing the Compatibility of ARROSOLO 3-3E in Tankmix Combinations**

The following procedure is suggested for determining whether or not ARROSOLO 3-3E may be combined with a specific herbicide for spray tank application.

**Materials Required:**

- ARROSOLO 3-3E
- Tankmix herbicides
- Adjuvant for spray tankmix combinations: Compex™, Sponto 168-D™, Unite™, or equivalent. The adjuvant which provides the best emulsification depends on the specific herbicide under consideration.
- Two one-quart, wide mouth glass jars with lids or stoppers.
- Measuring spoons. A 25 mL pipette or graduated cylinder provides more accurate measurement. 1 tablespoon equals 3 teaspoons equals approximately 5 milliliters.
- Measuring cup, 8 ounces (237 mL).

**Procedure:**

1. Pour a pint or about 473 mL of water into each quart jar.
2. Add adjuvant to one of the jars and mix. See Table 1 footnote for adjuvant rate.
3. The order of addition of tankmix herbicides is wettable powders first, followed by wettable dispersible granules, followed by flowables, followed by ARROSOLO 3-3E. See Table 2 for rates of tankmix herbicides to add to both jars.
4. If the tankmix herbicide being tested is a wettable powder, premix the wettable powder in 1/8 cup of water prior to addition to the pint of water.
5. Add ARROSOLO 3-3E to both jars. See Table 1 for rate to use.
6. Close both jars with lid or stopper and mix the contents by turning the jars upside down and back upright ten times.
7. Inspect the surface and body of the mixtures:
  - Immediately after completing the jar inversions.
  - After allowing the jars to stand undisturbed for 30 minutes.
  - Again after turning the jars upside down and upright again ten times after the 30 minute wait.

**Evaluation:**

- If a uniform mixture cannot be made, the mixture should not be used.
- If either mixture remains uniform for 30 minutes, the combination may be used.
- Should either mixture separate after 30 minutes, but readily remixes uniformly with ten additional jar inversions, the mixture can be used if adequate agitation is maintained in the tank.
- If the mixture with adjuvant is satisfactory, but the one without adjuvant is not, be sure to use the adjuvant in the spray tank.
- If adjuvant is needed, add to the spray tank first at a rate of 3 pints per 100 gallons of water.
- Foaming can be minimized by using moderate agitation.

- If nondispersible oil, sludge or clumps of solids form in the mixture, the combination should not be used.
