## PRECAUTIONARY STATEMENTS

### HAZARDS TO HUMANS AND DOMESTIC ANIMALS

#### CAUTION

HARMFUL IF SWALLOWED, INHALED, OR ABSORBED THROUGH SKIN. CAUSES MODERATE EYE IRRITATION. AVOID contact with skin, eyes or clothing. AVOID breathing dust. WASH thoroughly with soap and water after handling. REMOVE contaminated clothing and wash contaminated clothing before reuse.

Skin exposure may result in a transient sensation described as a tingling, itching, burning or prickly feeling. Onset may occur immediately to 4 hours after exposure and may last 2-30 hours without apparent skin damage. Wash exposed areas once with soap and water. Relief from the skin sensation may be obtained by applying an oil-based cream.

#### Personal Protective Equipment

Applicators and other handlers must wear:

- Long-sleeved shirt and long pants
- Waterproof gloves
- Shoes plus socks

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

**DIRECTIONS FOR APPLICATION**

**At Planting Band Treatment**

Apply FORCE 3G insecticide at planting time: Place the granules in a 7-inch wide band over the row behind the planter shoe, and in front of or behind the press wheel.

**GRANULES MUST BE INCORPORATED INTO THE TOP ONE INCH OF SOIL USING TINES, CHAINS OR OTHER SUITABLE EQUIPMENT.**

**DO NOT** apply this product as either a band or T-band treatment unless you can incorporate the granules as directed above. This will improve insect control and reduce the potential for adverse effects to aquatic organisms.

**Highly Erodible Land (HEL)**

When used on erodible soils, best management practices for minimizing runoff should be employed. Consult the ~~Natural Resources Conservation Service (NRCS) for recommendations for your use area.~~ ~~On highly erodible land draining to water bodies, ZENECA recommends consultation with the Natural Resources Conservation Service (NRCS) and/or other agricultural agencies to ensure that effective efforts are made to minimize soil erosion as well as runoff of herbicides and insecticides.~~ In particular, where highly erodible land (HEL) is adjacent to aquatic bodies, the 20 yard buffer/setback area should be planted to ~~crop or seeded with grass left in grass or other suitable natural vegetation.~~

For NO-TILL corn where runoff drains into adjacent or neighboring aquatic sites (ponds, streams, lakes), apply FORCE 3G as an in-furrow treatment only. See in-furrow directions below.

**At Planting In-Furrow Treatment**

Apply FORCE 3G at planting time as an in-furrow treatment for control of corn rootworms, wireworms, and seedcorn maggots. In-furrow applications may be made by (1) directing the granules into the planter shoe with the seed, or (2) placing the applicator tube directly behind the planter shoe so that the granules drop into the seed furrow.

NOTE: These settings should be used as starting points only. Continually check the amount of FORCE 3G used against a known length of row or acreage and make further adjustments accordingly. Also, check calibration occasionally to make sure equipment wear, changing conditions, etc., have not caused a change in flow rate.
