PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

FIRST AID: If swallowed, feed bread soaked in milk followed by olive oil. Call a physician immediately. If on skin, brush off excess chemical and flush skin with water for at least 15 minutes. If irritation persists, get medical attention. If in eyes, flush with cold water for at least 15 minutes. Get medical attention.

EPA Registration No. 10183-6

DIRECTIONS FOR USE: It is a violation to use this product in a manner inconsistent with its labeling.

Chlorisol is a cleaner and sanitizer for washing soiled eggs and to brighten eggs and reduce spoilage of fresh and stored eggs caused by bacterial contamination. Also chlorisol is an excellent compound for cleaning feed hoppers, water founts, poultry house equipment and egg handling rooms.

To sanitize previously cleaned food grade eggs in shell egg and egg product processing plants, spray with 1 ounce Chlorisol per gallon of water (200 ppm active). The solution should be warmer than the eggs, but not to exceed 130°F. Wet eggs thoroughly and allow to drain. Eggs sanitized with this product shall be subjected to a potable water rinse only if they are to be immediately broken for use in the manufacture of egg products. Eggs should be reasonably dry before casing or breaking. The solution should not be re-used for sanitizing eggs.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool, dry and well ventilated area away from heat or open flame. In case of decomposition, isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area.
