

The presence of algae in outdoor swimming pools is objectionable because of the color, cloudiness, odor, and increased chlorine demand of the water. The use of ALGAE KIL 10% will help to maintain the water in a clean condition. ALGAE KIL 10% is compatible with the usual water treatment chemicals. By controlling algae growth with ALGAE KIL 10%, the chlorine demand of the pool may be significantly reduced.

DIRECTIONS

- In freshly filled pools or pools showing no visible algae growth add one gallon ALGAE KIL 10% per 50,000 gallons of water to prevent algae growth. Apply by adding directly to the pool water.
- 2. If algae growth is observed, add one gallon ALGAE KIL 10% for each 20,000 gallons of water to kill and control those algae species most commonly found in swimming pools. When existing growth is dead, clean the pool, drain and refill if necessary, and add one gallon ALGAE KIL 10% per 50,000 gallons of water. Apply by adding directly to the pool water.
- 3. If the pool water treated as in (1) or (2) is recycled, add one gallon of ALGAE KIL 10% per 50,000 gallons of water every five to seven days to maintain between two and five parts per million of active ingredient. Apply by adding directly to the pool water. See serviceman for test kit.
- 4. If the pool water treated as in (1) or (2) above is not recycled or not filtered it should be tested periodically to determine the active ingredient content. When necessary, one gallon ALGAE KIL 10% per 50,000 gallons of water should be added directly to the pool water to maintain two to five parts per million of active ingredient.

This product is toxic to fish. Treated effluent should not be discharged where it vill drain into lakes, streams, ponds, or public water

Apply this product only as specified on this label.

DANGER

Keep Out of Reach of Children. Corrosive. Causes eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

FIRST AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before

If swallowed, drink promptly a large quantity of milk, egg whites, gelatine solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN

Probably mucosal damage may contraindictate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

CONTAINER DISPOSAL

Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place.
