## CHLOR CON 200 CONCENTRATED GRANULAR POOL CHLORINE

- Features a dry chlorine that dissolves immediately
- A most effective germicide and algocide
- Will not cause cloudiness in water
- Will not add scale forming minerals in the water
- Will maintain your pool crystal clear
- Flame-resistant

The control of pH is greatly simplified using Chlor Con 200 concentrated Pool Chlorine. In fact, you will require from 1/2 to 3/4 the amount of acid usually applied. Chlor Con 200 concentrated Pool Chlorine provides a more stable form of chlorine for easier maintenance of an effective chlorine residual in pool water for disinfecting action. It requires less storage space and maintains constant strength regardless of storage time. It is economical to use in that, after the pool is stabilized, you will need to apply Chlor Con 200 concentrated Pool Chlorine less often.

### INSTRUCTIONS

When starting up a new pool, superchlorinate to satisfy chlorine demand and to establish a chlorine residual of 1.0 ppm to 2.0 ppm available chlorine. To accomplish this, add 2 oz Chlor Con 200 concentrated Pool Chlorine per 1,000 gallons of pool water. The next morning, add powdered cyanuric acid at the rate of 4 oz. per 1,000 gallons to stabilize the pool. Chlor Con 200 concentrated Pool Chlorine should be added daily or as needed at the rate of 1/8 to 1/4 oz. per 1,000 gallons of pool water to maintain a chlorine residual of all times of 1.0 ppm to 2.0 ppm as determined by a suitable test kit. The pH should be maintained between 7.2 and 7.6.

A shock treatment should be made every week during hot weather or after heavy rains. Less frequent shock treatments may be made during cool weather. For the shock treatment, add 2 oz. of Chlor Con 200 concentrated Pool Chlorine per 1,000 gallons of pool water. Swimmers should not be permitted in the pool after the shock treatment until the chlorine residual has reached the 1.0 ppm to 2.0 ppm range.

Keep in mind that a slight acidity must be maintained in the event of heavy accumulations of dust and dirt caused by storms or super heavy bathing loads which require additional dosages as needed to maintain the chlorine residual between 1.0 ppm and 2.0 ppm.

### DANGER Keep out of reach of children

Corrosive causes eye damage. Do not get in eyes or on skin. Wear safety goggles, dust respirator and protective clothing when handling. Do not breathe dust. Dust may be harmful if inhaled. May cause skin, nose and throat irritation. May be fatal if swallowed. May cause burns to broken skin.

**FIRST AID:** In case of personal contact remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes get medical attention. Clean contaminated clothing before reuse.

If swallowed, feed gruel or cooked cereal followed by olive oil or cooking oil. Call a Physician immediately.

**DANGER:** Strong oxidizing agent. Moisture contamination may liberate irritating and hazardous chlorine-containing gases. Decomposes at 350-475°F with liberation of harmful gases. In case of decomposition, if possible, isolate container in open air or well ventilated area. Flood with large volume of water if necessary.

Mix only with water. Do not mix with other pool chemicals. Use only dry clean measuring utensils. Store in a cool dry place. Keep closed when not being used.

Do not reuse container. Rinse empty container thoroughly with water and discard.

This product is toxic to fish. Treated pool effluent water should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of wastes.

Apply this product only as specified on this label. EPA Reg. No. 10183-20

**CHLOR CON 200 CONCENTRATED GRANULAR POOL CHLORINE**

- Features a dry chlorine that dissolves immediately.
- A most effective germicide and algicide.
- Will not cause cloudiness in water.
- Will not irritate swimming pool surfaces.
- Will not irritate skin.
- Flame resistant.

The control of pH is greatly simplified using Chlor Con 200. Concentrated Pool Chlorine provides a more stable form of chlorine for easier maintenance of an effective chlorine residual in pool water for disinfecting action. If required, add storage Chlor Con 200 to maintain a constant strength regardless of storage time. The recommended use of Chlor Con 200 is outlined below. See the label for safety, first aid, and other precautions.

**INSTRUCTIONS**

When starting a new pool, suggest borate buffer, chlorine demand and stabilizing chlorine residual of 10 ppm (1.0 ppm available chlorine). In a comparison, add 2 oz. Chlor Con 200 Concentrated Pool Chlorine per 1000 gallons of pool water. The next morning, add powdered borate at the rate of 4.2 oz. per 1000 gallons to stabilize the pool.

Chlor Con 200 Concentrated Pool Chlorine should be added daily or as needed at the rate of 1.4 oz. per 1000 gallons of pool water to maintain a chlorine residual of or times of 10 ppm (1.0 ppm available chlorine). A suitable test kit for pH should be maintained between 7.2 and 7.6.

A shock treatment should be made every week during hot weather. If after heavy hot less frequent shock treatments may be made during cool weather. For the shock treatment, add 2 oz. of Chlor Con 200 Concentrated Pool Chlorine per 1000 gallons of pool water. Swimmers should not be permitted in the pool after the shock treatment until the chlorine residual has reached the 10 ppm (1.0 ppm) range.

Keep Chlor Con 200 in a cool, dry place. Do not use in the heat. If used in the heat, it should be used with care. Chlor Con 200 is a strong oxidizing agent. It should be used with care. It should be used with care. It should be used with care.

**DANGER** Keep out of reach of children

Corrosive causes eye damage. Do not get in eyes or on skin. Wear safety goggles, dust res. protector and protective clothing when handling. Do not breathe dust. Dust may be harmful if inhaled. May cause skin, nose and throat irritation. May be fatal if swallowed. May cause burns to broken skin.

**FIRST AID:** In case of personal contact, remove excess material and flush skin or eyes with cool water for at least 15 minutes. For eyes, get medical attention. Clean contaminated clothing before reuse.

If swallowed, lead glass or cowled cereal followed by olive oil or cooking oil. A physician immediately.

**DANGER:** Strong oxidizing agent. Moisture contamination may liberate irritating and hazardous chlorine-containing gases. Decomposes at 350-475°F with liberation of harmful gases. In case of decomposition, if possible, isolate container in open air or well ventilated area. Flood with large volume of water if necessary.

Mix only with water. Do not mix with other pool chemicals. Use only dry clean measuring utensils. Store in a cool dry place. Keep closed when not being used.

Do not reuse container. Rinse empty container thoroughly with water and discard.

This product is toxic to fish. Treated pool effluent water should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of wastes.

Apply this product only as specified on the label.
