

NGER

25 LBS. NET WT.

DURA-TABS Slow dissolving tablet, to provide continuous chlorination to control bacteria and algae.

DIRECTIONS FOR USE

Initially pre-condition your pool water with **ECONOCHLOR** liquid or **POWDERED ECONOCHLOR**. Follow directions on the label of these products.

RECOMMENDED DOSAGE: For each 15,000 gals. of pool water, place 3 tablets (4.8 oz. by wt.) in the skimmer basket. Allow 8 to 12 hrs. for chlorine residual to equalize. Initial treatment will last from 2 to 4 days depending on water temperature and flow rate through the skimmer. Chlorine residual should be maintained between 1.5 and 2.0 ppm as determined by a suitable test kit. If daily testing indicates the chlorine level to be low, increase the number of tablets in the skimmer basket. If daily testing indicates the chlorine level to be higher than 2.0 ppm, reduce the number of tablets accordingly.

Once every two weeks a shock dose of 5 ppm chlorine should be made to prevent the development of resistant species of algae. **DURA-TABS** are not recommended for this purpose. Regular **DURACHLOR** used at the rate of 1/2 lb. per each 10,000 gallons of water will satisfy this requirement when used in conjunction with **DURA-TABS**. Keep pH of water between 7.2 and 7.6 as determined by a suitable test kit.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

PRACTICAL TREATMENT: (FIRST AID): If swallowed feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately.

If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention.

If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS — STRONG OXIDIZING AGENT: Strong Oxidizing Agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in cool dry, well ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, or bury in a safe place.
