

USDA Reg. No. ~~200000~~

Pineteen

PINE-TYPE DISINFECTANT

A fragrant bactericide and germicide with refreshing perfume
Phenol Coefficient=5 20° C. (AOAC Method)

ACTIVE INGREDIENTS:

Isopropanol	9.10%
Soap	10.00%
Sodium Chloro-ortho-phenylphenate	3.90%
Pure Steam Distilled Pine Oil	17.00%

INERT INGREDIENTS:

Water	60.00%
-------------	--------

DIRECTIONS: Always dilute with water before using. For maximum efficiency, clean surfaces well before applying disinfectant solution, and make sure solution comes in contact with all infected areas. Use warm water when possible. As a general disinfectant, apply a solution of 1 part Disinfectant to 80 parts water. Let this remain on surfaces as long as possible.

LOCKER ROOMS, URINALS, TOILETS, SINKS, FLOOR, ETC.: Clean thoroughly and apply a solution of 2 oz. disinfectant per gallon of water. **AS A DEODORANT SPRAY:** Use 2 oz. Disinfectant to each gallon of water. **AS A GERMICIDAL RINSE:** Use 2-4 oz. per gallon of water. Leave in contact with articles to be disinfected for several minutes.

CAUTION: POISONOUS IF TAKEN INTERNALLY.
KEEP OUT OF REACH OF CHILDREN.

ANTIDOTE: Give milk, white of raw eggs, mucilage or corn-starch paste and follow with emetic such as a tablespoon of mustard in a tumbler of warm water. Call a physician. Avoid prolonged or repeated contact with skin. Wash thoroughly.
