KILL-KO
ARSENICAL WEED KILLER
KILL-KO IS NON-SELECTIVE — WILL KILL EVERYTHING GREEN

Active Ingredients: Sodium Arsenite.....30.00%
Inert Ingredients:70.00%
(Total arsenic, as elemental,
water soluble form).....17.25%

DIRECTIONS:

Annual Weeds and Grasses: Use 2 gallons mixed with 12 gallons of water. Apply to vegetation on 1000-1500 sq. ft., wetting all leaves, stems, and root crowns.

Perennial Weeds and Grasses: Weeds that do not spread by underground rhizomes. Use one gallon mixed with sufficient water to give coverage to 300-500 sq. ft. depending on amount of vegetation. Wet all leaves, stems, and root crowns.

Barron Soil: Use 2 gallons on 100-200 sq. ft. May be mixed with water for more even coverage. This treatment should last one growing season.

Tree Killing: Cut deep gashes into bark and wood with axe or pick and pour Kill-KO into cavities. Pour over freshly cut stumps to prevent sprouting.

Suitable Treatment Areas: Kill-KO kills most weeds and makes soil unproductive for growth in such areas as around buildings, along walls, paths, fences, roadways, tennis courts, railroads, and similar places. A few species able to tolerate high concentrations of salt in the soil, such as yellow star, thistle, bract scale, hay field tarweeds (Hemizonia) and knot weed, resist the action of Kill-KO.

DANGER

POISON

Warning: This is a very poisonous solution and extreme care must be taken to keep it away from people and animals and to avoid getting it on the skin or in the eyes, nose, and mouth. If spilled, wipe up (destroy wipe rags), rinse area with clear water. Dispose of empty containers by rinsing out with water and placing in trash container. Do not store with food or feed stuffs. Avoid breathing spray mist. Avoid contact with clothing. Keep children and animals off treated area until washed into soil. This product is toxic to fish and wildlife. Birds and other wildlife in treated area may be harmed. Keep out of any body of water. Apply this product only as specified on this label. Do not use in or around the home. Poisonous if swallowed. Do not apply to soil overlaid with roots of desirable plants.

ANTIDOTE: Call a physician immediately. Give a tablespoon of salts in a glass of water (warm) and repeat until vomit fluid is clear. Then give two tablespoons of Epsom Salts or milk of magnesia in water and plenty of milk and water. Have patient lie down and remain quiet.

Do Not Use or Store In or Around The Home. NET CONTENTS GALS. Do Not Allow Domestic Animals To Graze Treated Area.
