**PRECAUTIONARY STATEMENTS**

**Hazards to Humans and Domestic Animals**

Causes irreversible eye damage and skin irritation. Harmful if absorbed through the skin or inhaled. May cause skin sensitization in certain individuals. Avoid contact with skin, eyes or clothing. Avoid breathing dust. Protective clothing including goggles should be worn. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

**Environmental Hazards**

This product is toxic to fish and aquatic organisms. Do not apply to water except as specified on labeling.

**Storage and Disposal**

Do not reuse empty container. Wrap in several layers of newspaper and discard in trash.

**DIRECTIONS**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This box contains 4 sealed, water-soluble plastic bags, each containing 8 oz. of Utility ROOTAWAY Root Destroyer Crystals. Best results are obtained if all applications of Utility ROOTAWAY Root Destroyer are made at night when the smallest amount of water goes through drainage lines. When applied at time and in amounts as directed, these soluble bags can be dropped unopened into a toilet or main trap. (Never into basin, sink or tub.) The bag dissolves in two minutes and the crystals can then be flushed into the drainage lines. As a preventive: To ensure root-free drainage lines, apply an 8 oz. bag of ROOTAWAY Root Destroyer every three weeks during the spring and summer growing season. Follow this by the same treatment once every eight weeks during the remainder of the year. Where root growth has reached the point where drainage is sluggish, 8 oz. applications should be made twice weekly until the condition has been corrected. Follow with preventive treatment as above. Where root growth is so great as to cause complete blockage, quickest relief is obtained by having roots removed mechanically. To avoid future clogging use preventive treatment.
